

From Crisis to Catastrophe to Cataclysm

"A RECIPE FOR NATIONAL SUICIDE"

(Sep. 23, 2023) — The Hoover [post](#) published Friday cogently asks when unstoppable immigration will become a crisis.

It can be posited that the process already began Jan. 20, 2021 — the day of Brandon’s installation as Chief Execu-Goof — when by executive order/proclamation he halted construction of The Wall. Since then, the invasion crisis has become a catastrophe and continues to metastasize into a cataclysm. With Brandon, Vice-President Harris and DHS lunatic Alejandro Mayorkas overseeing the Southern Border, it is being gradually destroyed.

Would anyone be surprised if it were learned that U.S. foreign aid dollars (*i.e.*, tax dollars) and perhaps even ships and aircraft were being used worldwide to facilitate and defray travel expenses of aliens seeking to come here to cross the border into Texas, New Mexico, Arizona and California? Precedent already exists in the form of our disastrous exit from Afghanistan.

Would anyone be surprised if it were learned that similar tax dollars were being used to tutor foreigners on the way here, in their own languages, to articulate, in English or Spanish, the sentence: “I seek amnesty” or “Pido amnestía?” That puts them on a fast track to disappearance onto the streets of any city, town or village in America, likely indefinitely.

No “smoking gun” proof of those possibilities yet exists, but the question was: would it surprise anyone if it were shown to be true? With the Execu-Goof still at the helm, anything that furthers the erosion of the nation’s sovereignty is possible and, in Brandon’s view, desirable. Ask yourself this: how does this view differ that much from that of George Soros or the mullahs of Iran?

The Democrat cabal now in charge detests the United States and now seeks to destroy it from within by allowing millions of illegal aliens to invade, overburdening already inflation-decimated taxpayers with ever-skyrocketing costs for food, electricity, shelter and healthcare while local governments ratchet up tax rates to accommodate the illegals’ ever-increasing “needs.”

Portrait of Benjamin Franklin by Charles Willson Peale ([Library of Congress](#))

This is a recipe for national suicide. If it is not halted — ***and reversed*** — soon, even before the 2024 general election, it may be too late..., and Franklin’s [admonition](#) will have come true.
