MtDNA Haplogroup per HVR1 Results: T1

HVR2 MtDNA Test Results: In Process

Date MtDNA Test Was Ordered: November 2003

Comments: I am still waiting on my HVR2, Y-DNA and DNAPrint results. In the meantime, my mtDNA results have been received. Unfortunately, my maternal pedigree ends quickly. My great-great-grandmother, Emma Elizabeth Addis was adopted as a young child. She was born 1867 in Missouri. She married Charles Norelle Taylor. She died April 1954 in Jackson, Mississippi. After 25 years of research, we still no nothing else of her past. My maternal ancestry is as follows: I am the son of Shirley Ann Clark (b. 1941 Jacksonville, FL); grandson of Elizabeth Kathryn Tart (b. 1917 Pensacola, FL, d. 1995 Jacksonville, FL); great-grandson of Minerva Catherine Taylor (b. 1892 Bessemer, AL, d. 1942 Jacksonville, FL); great-great-grandson of Emma Elizabeth Addis (b. 1867 Missouri, adopted circa 1870-1880, died 1954 Jackson, Mississippi). I hope to find someone who is related to my maternal ancestors who may know of the Addis family in Missouri and be able to help me connect the dots, so to speak.

HVR2 MtDNA Test Results: not tested-pending

Date MtDNA Test Was Ordered: Nov 2003

Comments: No Haplogroup assigned yet, mtRefine ordered as well as Y & DNAPrint tests... Will add info as I get it. Sunny Stephens (tested person) is my husband. His mother was a Gypsy from India. Not much is known about her because her mother died in childbirth and she was due to be put out to die but was taken in by a missionary who took her to a convent where she was raised... Sunny did some tracking and found that her father's surname was Manalal and she did have some

brothers--we are not in contact with his family. All we know is that they were Gypsies, originally connected to the Princes in Rajahstan as sword-makers, but after the Raj they went into stone-quarrying in Rajasthan. That's all we know! Anyone interested in Gypsy or Indian mtDNA? I'd love to hear from you! Cyndi in Baltimore

Testing Company Used: FamilyTreeDNA

HVR1 MtDNA Results: 16124C, 16223T,16278T,16362C,16519C

MtDNA Haplogroup per HVR1 Results: L3b

HVR2 MtDNA Test Results: 73G, 263G

Date MtDNA Test Was Ordered: March 6, 2003

Comments: I am originally from Missouri, my parents are from Arkansas. Before that I am unsure of origins. My mother's maiden name is Burnside, her mothers name was Georgia Anne Burnside, her mother was Margaret Sanders, my mothers father was Albert Burnside. My father was Josephus Keeble, his father was Capus Keeble, my fathers mother was Gertrude Jackson. In terms of racial origins it has been a unclear journey. At first we thought we had native american admixture only to find after the dna sampling there is none. The results show that I am 39% Indo-European and 61% African. Unfortunately the tests do not break down portions any smaller than the ones I've quoted. So what does Indo-European mean? It could mean anything from Irish to Greek. I suppose this is the weak link in dna testing, one really never gets the entire story. Most if not all info is based upon what was passed down orally from your family. If that wasn't accurate than you really have only the vague description provided from the testing. It has had it's interesting points in terms of others replies to my posting. Some have said that my mtdna is Ethiopian, others that I have at least one mutation that is ancient Roman. When I use the concordance I come up with everything from Turkish to Algerian. At any rate, the African is a known, but what tribe? What area of the continent? So, some questions will remain unanswered despite this new and exciting technology.

Date MtDNA Test Was Ordered: October 2003

Comments: Great-Grandmother, Mattie Belle (Peters) Lyon, born March 17, 1874 in Michigan, died April 21, 1938 in Aberdeen, Washington. I don't know her ethnic origin. Family story is her parents died in a train accident when she was young. She had a brother and they were raised by an Aunt and Uncle. I can only assume this was in Arkansas. I have been able to trace her from Sedgwick Co., Arkansas when she married by Great-Grampa Lyon, William Elsworth Lyon to Crittenden Co., Poinsett Co. and Clay Co., Arkansas to Washington. I don't have names for her brother that died young or her parents or Aunt and Uncle. I hope to find a DNA match and through our match maybe I can find her ancestors. I have a web page for my Great-Gramma Lyon at <http://www.phyllis.ws/belle.htm>

Date-Time: Tuesday, November 25, 2003 at 08:07:51 (CST)

Testing Company Used: FamilyTreeDNA

HVR1 MtDNA Results: I have 5 HVR1 mutations: 16129A, 16188T, 16223T, 16391A, and 16519C.

MtDNA Haplogroup per HVR1 Results: FTDNA says N*; others say I*

HVR2 MtDNA Test Results: I have 8 HVR2 mutations: 73G, 143A, 199C, 204C, 250C, 263G,

315.1C, and 469A.

Date MtDNA Test Was Ordered: 9 July 2003

Comments: my mother: Wanda Myrtle (Casebolt) Kraus b 10 June 1913 Chautauqua Co, KS, d 4 March 2000 Centerville, Barstable Co, MA, daughter of: Nannie Grace (Burden) Casebolt b 31 December 1881 Roundmound community, Chautauqua Co, KS, d 25 Sept 1956 Hutchinson, Reno Co, KS, daughter of: Angeline (Ruggles) Burden b 1 June 1853 Hendricks Co, IN, d 11 April 1889 Montgomery Co, KS, daughter of: Nancy (Rabourn) Ruggles b 10 Dec 1817 Kentucky, d 20 June 1887 near Lewis, Vigo Co, IN, daughter of: Mary (Turner) Rabourn b 1795-96 Virginia, d 1860-70 Lewis Co, KY, origins unknown although Turner certainly sounds English. I never expected my mtDNA to be nearly as rare as it apparently is. My DNAPrint results say 90% European, 10% Native American -- although I have been diligently searching my ancestral lines for 40 years, I have no clue, so far, as to where the 10% came from. My father's people are of German-Austrian? origin are are yHaplogroup G, also pretty rare I am told.

Date MtDNA Test Was Ordered: Oct 2003

Comments: Last maternal ancestor Ephemata Wiggins, born Georgia, USA about 1810. She is believed to be of Scots ancestry, but definitely had maternal ancestry somewhere in the UK. I have found a few other US women with U3 haplogroup, 16343G and 16390A mutations. All have presumed recent ancestry in the British Isles. Although the ancestral 16343G mutation arose in the middle east about 10,000 BC, members of haplogroup U3 have probably been in NW Europe since the neolithic. They traveled by sea through the Mediterranean to North Portugal and on to the British Isles and Scandanavia. They might have brought wheat and barley cultivation to NW Europe. About 2% of the people in Norway and Scotland are in group U3 today. In the scheme of Brian Sykes we are the Uma clan.

HVR2 MtDNA Test Results: HVR2 test -- CRS - No Mutations

Date MtDNA Test Was Ordered: 20 August 03

Comments: My oldest ancestors maiden name was Betsy Burke born in VA about 1790 VA. She died about 1860 Newport, Tennessee. I have no first hand information as to the ethnic origin of the Burkes. From the name Burke and the knowledge that most of the people around Newport, Tennessee, at that time, were Scots, I suspected the Haplogroup "H" Northern European. I thought my Y-DNA print test would show IE -100%, because all of the NA genes would have run out with my mother or grandmother. The actual results were IE-93%;EA-7%;NA-0%;SA-0%: The EA has to reflect NA. I now know that my Mantuth (Monteith) and Frasure (Fraser) ancestors that went to TN from VA had more NA blood than I thought and the families may have intermarried more than I know.

Comments: Mother (Sheva Sarah) came from Russian Poland, near Lublin, probably either Izbica Lubelski (home town of father), Rejowiec Fabryczna (hometown of mother) or a shtetl very close by called Serow. She emigrated with her mother and sister in 1921 (Serow? to Warsaw(1907) to Danzig to London to Liverpool to NY City). Grandfather was Hsh-Zvi Szyrft, grandmother was Pesha who died in childbirth in 1864 in Rejowiec Fabryczna. Mother, Bina (1864) md. Yosef Yitzkhok Klajman in 1887. He d. 1906 Their daughter, Sheva Sarah born between 1892 - 1906, date unknown. They were Jewish. According to FTDNA, the mtdna haplogroup is consistently Jewish from Ruissian Poland. YDNA haplogroup is E3b, Russian Jewish ancestry. No matches, but no surprises either.

Date MtDNA Test Was Ordered: 14 Aug. 2003

Comments: This would be my gr gr grandmother Mary Ellen Leonard. (The name Leonard has been spelled different ways) She was born 2 Dec 1836 possibly in Illinois. She died 1 Dec 1871 in Montgomery Co. Illinois. She is believed to be part Indian and her daughter, my gr grandmother looks to be part Indian from her pictures. I have been unable to find out anything about the parents or siblings of Mary Ellen Leonard. There is a strange note to her last name. In my great Aunts Bible was found a sheet of paper with Mary Ellen's last name being Corbin, but her marriage record gives Linard as her last name. Mary Ellen married Francis Marion Terry 12 Nov 1854 in Fayette Co. Illinois. The Terry''s came from England. I haven't received the written report on my mtDNA test yet but wasn't too surprised at what I have found so far. I believe that there may be some Melungeon ancestry but this is more likely to be on my Dad's side.

Comments: My oldest known documented direct line Maternal ancestor was a Maria Zarvel, b. about 1789 in Reichenbach, Kreis Pyritz, Regierungsbezirk Stettin, Pommern, Prussia.

Reichenbach is now Radaczeno, Szczecin, Poland.; I've been told this 16093C mutation is not uncommon in Poland and Russia, and I wonder if my maternal ancestors were not actually Poles or Slavs who were intermarried, impregnated, or assimilated by the German speaking Prussians in control. Any ideas???

Comments: Oldest known maternal ancestor is Caroline Lenz born Nov. 26, 1833 in Greifenberg district/county, province of Pomerania, northeastern Germany. (This area of Pomerania was later ceded to Poland following WWII.) She married Carl Laabs on Oct. 14, 1854 in Sarbin (or Zarben?), Greifenberg district/county. They immigrated to the Milwaukee(?), Wisconsin area about 1855-56 and thence to Pecatonica, Illinois in 1863. She died on Nov. 23, 1917 in Pecatonica (Seward Township). mtDNA Haplogroup U2 is called Clan Uta by Oxford Ancestors. My Y-haplogroup is confirmed by FTDNA as R1b;my FTDNA DNAPrint results are 97% IE and 3% EA.

Comments: Earliest known matrilineal ancestor was Martha Hamilton, born South Carolina, 1778. All my research indicates English and UK ethnic origins of that line. I had an earlier test done by Oxford Ancestors, and they designated me a Tara (T). After being queried, they said I might be H instead of T because of differences in interpretation of allele development. FTDNA says I am H, as I have shown above. For the markers commonly tested, results from both OA and FTDNA were consistent. FTDNA,of course, tests for many more mutations than does OA.

Comments: My direct maternal line has always been a bit of a problem. I know that my GG Grandmother Sarah Hughes was born in the USA circa 1857, but as a child was sent back to Wales after her mother died. She was brought up by other family members in the Newbridge area of Monmouthshire. I do know her father was a John Hughes a coal miner, but in any census of the UK Sarah appears on she only states born USA. My original reason for going down the DNA line was trying to prove familial connections with those with my surname Roderick which in Wales has derived from a very old Welsh name Rhydderch. So far most of the Welsh Rodericks tested seem to have some links that is except for me, I turn out to be of Haplogroup G which is pretty uncommon in the UK and Wales. Then to find that on the mtDNA results that I am of Haplogroup I is even more interesting. So far I have found two people who's results are very near matches to me, both are from the USA but having origins in the UK. One has Scots/Irish roots and the other Somerset England origins.

Date MtDNA Test Was Ordered: Aug 2003

Comments: My maternal grandmother was Z. Blakely, born 1891 in Missouri. Her mother was Minnie D. Covey DOB 5/22/1866 also of Missouri. Her mother was Phedelia (sp?) Mclaughlin DOB March 07, 1844 of Indiana and so on to Lucinda SHAW DOB August 03, 1818 of Virginia (who came to Missouri in a covered wagon with her husband David Coon) and finally her mother, Sally STRONG born 1792 in PA. Have no idea as to the names or ethnicity of maternal ancestors prior to Sally Strong. As I never met any of my maternal relatives and tested out as "X Haplogroup" I am wondering if one of them possibly had Native American ancestry? If anyone has information on further testing that might be of assistance to me, please feel free to contact me. I would also like to hear from other people with similar testing results or information on any of the maternal relatives I have listed above. Despite the fact that I received my mtDNA test results sometime ago from Oxford Ancestors, I have not been provided with the necessary information to access their mtDNA database. THANKS!

Comments: Over the last decade I have made connections to over 3000 forebears in a swathe across the north of the County of Lincolnshire in England. Some spill over into Yorkshire, and others travel down Lincolnshire to Norfolk. My recently obtained Y-line sequences suggests a connection to a paternal ancestor in Northumberland. My earliest confirmed matriline forebear was Martha Harrison born circa 1632 in Lincolnshire (as were all the following). Previous to her were Martha Sowerby (1666), Martha Richmond (circa 1695), Mary Sowerby (1726), Mary Bristow (1760), Mary Nussey (1795), Sarah Wood (1833), Alice York (1859), Florence West (1884) and my mother Reta Millson (1911). I have found several references to 16224C and 16311C, as standard mutations for Clan Katrine (Oxford Ancestors). So far I have only once found them associated with 16245T, and that was in Denmark. Emails welcomed from anyone with a match, or with information on the latter mutation, and its origins.

Testing Company Used:

HVR1 MtDNA Results: 16129A, 16223T, 16391A

MtDNA Haplogroup per HVR1 Results: X (but it is I)

HVR2 MtDNA Test Results: not tested

Date MtDNA Test Was Ordered: Sept. 2002

Comments: Oldest known maternal ancestor is gt-gt-grandmother in Co. Wicklow, Ireland, born c. 1830. Maternal ancestry is simply known to be Irish. Testing was done through OA, who told me my Haplogroup was X. After some correspondence with them, I found I was I, but that they combine I, W and X, calling them all X, as all have 16223T in common. I have not found anyone yet with just my 3 mutations - all seem to have a few extras!

Comments: First definite matrilineal ancestor: Sima Rozovskij (married name: Dobrin or Dobrinsky), born about 1850 in Bragin or Loev in southeastern Belarus (near Chernobyl). Died: ? Sima was the daughter of Ephraim Rozovsky (long-distance coach driver, klezmer musician, red hair. Maybe had relatives in the timber trade. Seems to have been Israelite, rather than Cohen, but maybe he was actually Cohen.). Sima's mother was either Ephraim's wife Bertha (Beila?) or Ephraim's wife Etel, daughter of Shlioma, born 1813. Two people with exact matches (HVR1 and HVR2) say their earliest matrilineal ancestors were born in Skapiskis, Lithuania, and Lyubcha, Belarus (near Novogorodok).

Comments: My maternal grandmother died in Guyana but I believe she was born in India. Some people in the family say she was from Madrass in Southern India but do not know this for sure? To be honest I didn't know what results to expect for my DNAPRINT since I don't know much about my genealogy just that I am of East Indian background from Guyana. As far as I know all my grandparents were from India and of the Brahmin caste. This is why if anything I would think my results would have been 100% IE. When I think of EA I don't think of East Indians. If anyone else is of East Indian background I would like to hear from you. My DNAPrint results IE 67%, EA 33%.

Comments: Oldest known direct line maternal ancestor is my gt-grandmother, Catherine Keogh, born c.1840 in Co. Wicklow, Ireland. I had no expectations of any particular haplogroup. OA actually told me I was Haplogroup X, but after seeking clarification from them as well as reading other available info, I find I am sub-clade I. I have not found anyone else with my 3 mutations so far. Plenty of people seem to have my 3 mutations plus others, but not just the 3 I have. I would

like to understand the significance of this.

Comments: Earliest known maternal ancestor is Sarah Farmer (no details known) the mother of Mary Ann Kemsley born 1819 in Wouldham, Kent England, died 1886 in Wouldham. All ancestors believed to be English. OA have no matches for my mtDNA results, they commented as follows... "The sub group that you have been placed in accounts for approximately 1.5% of our MatriLine customers. The majority of people in this group have a mutation at position 16162. There are also quite a few with mutations at both positions 16162 and 16209. Therefore it seems likely that the mutation in your sequence at position 16215 is a relatively 'recent' mutation, as we have seen no other people who have these same three mutations as yourself."

Comments: My oldest maternal ancestor was Frances Gibeons, born in either 1609 or 1619 in England. Her father was believed to be Thomas Gibeons or Gybson and her mother was named Elizabeth, according to a will dated 1562. Frances came to the Virginia colony on what I think was a shipload of unnamed women as I have scoured several passenger lists and can't find her. She later married Robert Booth in 1632 and died Oct. 25, 1658. The remaining "tale line" members are Frances' daughter, Ann Booth, Elizabeth Clopton, Ann Moss, Jane Diuguid, Jane Kyle, Martha Pitzer, Frances Smith, Lillian Dorchester, Margaret Gulick, and myself, Mary Otis Minshall. If anyone wishes to exchange genealogical information with me, please feel free to contact me at e-mail address above.

Comments: My earliest known mt ancestor is my XXXXXXXX grandmother who married Christian Fender, whose parents migrated from Baden-Durlach. He was born about 1735 in PA. The family then lived for a time at Germanna in VA. In 1768 he is on the tax list on the forks of the Yadkin River.(present Davie County, NC) He is on the Rowan County, North Carolina tax list in 1778. In 1782 he is on the tax list in Surry County(present Yadkin Co NC) as owning land on Deep Creek. In 1786 he was on the Surry County, North Carolina Census. He was on the 1790 and 1800 Surry County Census. Christian died in 1800; left a will that named his wife Mary and all his children. Mary lived to about age 108 and was living with her youngest daughter, Sarah Gentry

when she died. I descend through her oldest daughter: ANNA MARIA "MARY" FENDER was born Bet. 1767 - 1769 in VA or NC, and died Bet. 1849 - 1850 in Ashe Co., NC (in the area now named Alleghany). She married JOHN DANIEL HOPPAS/HOPPES/HOPPERS Abt. 1783, son of GEORGE HOPPES and ANNA KERN. He was born December 07, 1757. Most likely in the area now known as Yadkin Co., NC, and died February 07, 1816 in Ashe Co., NC (in the area now named Alleghany). Their daughter: SARAH HOPPERS, b. May 27, 1797, NC; d. November 13, 1829, Ashe Co., NC (in the area now named Alleghany); m. HENRY WAGONER, Abt. 1817, Surry Co., NC (in the area now named Yadkin); b. 1793, Surry Co., NC (in the area now named Yadkin); d. 1895, Ashe Co., NC (in the area now named Alleghany). Their daughter: Matilda who married Josiah Caudill of Alleghany co, NC. Their daughter: Susan Fanny who married Meredith Holloway March 23, 1873 in Alleghany co, NC. Their daughter: Mary Jane who married George Jackson 1895 in Burnet County, TX. Their daughter: Avis Susan Cordelia who married Virgil Lewis Sept. 11, 1926 Their daughter: Me

HVR2 MtDNA Test Results: 73G, 146C, 150T, 210G

Date MtDNA Test Was Ordered: March, 2003

Comments: My father is deceased but Paleo-DNA Lab in Canada was able to retrieve mtDNA from the sweatband of his old ballcap. The mtDNA results are consistent with expectations re: his oldest maternal ancestor, Clarissa JARVIS who was born in VT in 1807 and died in Athens Co., OH in 1886. She married Isaac REED in 1831 in OH. The lab was also able to retrieve some of my father's nuclear DNA but it was degraded and only yielded 3 of the CODIS markers. They are hopeful that useable DNA will be found as their methods improve in the future. There is evidence of Shawnee and Pamunkey ancestry in my father's line and I am hoping that DNA will eventually be retrieved which will allow DNA print and Y Chromosome testing. I expect the Y chromosome to be European as I have traced this line (Kessler) back to Mengen, Swabia, Wuertemberg, GER in 1580.

Date MtDNA Test Was Ordered: 2000

Comments: My oldest direct line maternal ancestor is Elizabeth CROSS who was born between 1712 and 1731 in Calvert or Baltimore Co., MD and died after 2 Feb.1792 prob.in Fayette Co., PA. She married John CARR 16 April 1750. There are two matches to my mutations in the OA database, one in Lancashire, ENG and the other in Devonshire, ENG. which is consistent with location of the English CROSS families most likely to be my ancestors. There was another result with my mutations plus one additional mutation from a person in Trapani, Sicily. This person's website indicates his mother's maiden name was CROSS! The only other information I have on

Elizabeth CROSS is an undocumented statement from one descendant that Elizabeth was " of Indian descent, possibly Choctaw." If true this would not be in her direct maternal line as demonstrated with these mtDNA results. I have evidence of other NA ancestry (Shawnee, Pamunkey)in my father's line. My DNA Print results showed 12%EA and 88%IE. My mother's DNA print showed 10%EA and 90%IE. My father is deceased but Paleo-DNA Lab in Canada was able to retrieve mtDNA from the sweatband of his old ballcap. It showed mtDNA Haplogroup U with polymorphisms at 16362C, 73G, 146C, 150T, 210G. This is consistent with expectations re: his oldest maternal ancestor, Clarissa JARVIS who was born in VT in 1807 and died in Athens Co., OH in 1886. The lab was also able to retrieve some of my father's nuclear DNA but it was degraded and only yielded 3 of the CODIS markers. They are hopeful that useable DNA will be found as their methods improve in the future.

Date MtDNA Test Was Ordered: June 2003 and retest

Comments: I don't know much about my maternal great grandmother. I knew they were supposed to be Irish but Protestant so assumed they were Scot Irish. I know that Clara McCoach was my great grandmother, dob 1877, in Philadelphia. I think her mother was named Martha, married to James McCouch, shows her dob as 1844, in Ireland. The haplotype "I" came as a great surprise. FamilytreeDNA is retesting as I do not have all the mutations usually assoicated with "I". I was told that Oxford would have lumped all "I" haplotypes as "X". I am hoping that the second HVR2 test will clarify.

MtDNA Haplogroup per HVR1 Results: T2

HVR2 MtDNA Test Results: 73G, 263G

Date MtDNA Test Was Ordered: 2 April 2003

Comments: Oldest known direct maternal ancestor is: Mary Johnson, b. abt. 1725 (birthplace not stated, but obviouly close to her husband) who married John Orr of Ballykeel and Conlig, Co. Down. (Data from Ulster Pedigrees by Ray A. Jones 1977). The Orrs were Scots who came to Co. Down about 1606, and the other names in the maternal line, Orr, Stewart, Kennedy, Lamont support this. Thus, the T2 haplogroup is consistent. However, my Y-DNA haplogroup asignment is R1a (Kurgan: SRY10831.2- done by Family Tree DNA), which is very strange as I know that my paternal ancestors came to Co. Monaghan, Ireland between 1700 and 1730. Clearly, despite the

name Harper, they were not your usual Scots, but Central Asian. An ongoing HARPER surname DNA project confirms that there are several unrelated lines with the same last name.

Date MtDNA Test Was Ordered: 11 March 2003

Comments: The earliest known maternal ancestor of this line was named Sarah, surname unknown, married to Hugh Kelso. They were the first generation of Ulster Scots immigrants, who settled in Worcester, MA around 1718. They were a tight-knit group of Covenanter Presbyterians, who tended to marry within the group. The Kelsos, as a clue, came from the Strathclyde region of Scotland, near the Firth of Clyde and River Clyde. The earliest inhabitants of Strathclyde were probably the Britons. I don't have solid evidence, but my hypothesis is that the haplogroup I maternal ancestors of this line came very early to Britain, when it was first settled, and thus made up a part of the Britons, who were there before many others came. They spoke a language ancestral to Welsh. So far, the only very near match I have been in touch with is a Welsh man, so this seems like a good sign. I had no particular expectations, but I didn't want to be in H, and was hoping for an ancient and uncommon haplogroup, and that was what I found in haplogroup I. The only one I would have liked better would have been U. I'm the one running the Haplogroup I Home Page, and hope to hear from all members of this haplogroup, so your results can be compared with the others who have already participated. Thanks!

Comments: My great-great grandmother Ita Raisa was Jewish. Her maiden name is unknown. She married Velvel (Wolf) PRUSSAK. Ita Raisa was most likely born in the 1850's. Her daughter Betsy (Pesia?) was born ca. 1874. Betsy claimed she was from Vilna Gubernia (The Province of Vilnius). Ita Raisa died when Betsy was a baby or young child (1870's?). I believe the family lived in the part of Vilna Gubernia that is now located in Belarus. Evidence points to them living in a town in the district of Lida; more specifically the town of Schuchin (sp?).

Comments: Earliest known ancestor Hannah Brittin Anthony b.< 1795. Probably Scots/Irish. Past surnames: Coleman, Murphy, Anthony. The Ursula clan were the first modern humans to settle in Europe, during the Upper Paleolithic era about 40,000 years ago. They were the Cro-Magnons, who produced the cave art in Southern France, of whom the Basques are probably a surviving remnant. They were hunters, not farmers, and developed a new type of stone tool. The Ursula clan spread throughout Europe, sharing it (according to modern thinking) with the Neanderthals for about 20,000 years. During the ice age they retreated to Spain, where they combined with the Valda clan. Other European groups retreated to the Balkins and the Ukraine during the ice age. When the glaciers melted, about 16,000 years ago, Europeans from all three areas spread out again through Europe. The other five clans began arriving in Europe at the end of the Ice Age and also spread throughout Europe. Ref. "The Seven Daughters of Eve" by Prof. Bryan Sykes.

Date MtDNA Test Was Ordered: January 2002

Comments: My known direct maternal line is as follows (starting with my mother, and all were native to northeast Scotland and mostly from farming families) :- Sheila MacArthur (1921-1950) (born in Inverness) Mary MacArthur (1895-1958) (born in eastern Ross-shire) Jessie Mackenzie (1854-1941) (born in Edderton, Ross-shire) Janet Robertson (1828-1900) (") Janet Macpherson (1807/8-1894 (") Catherine Ross (born ca.1780?)(" , probably) The description of "Katrine"'s origin and dispersal of descendants through 15,000 years appears logical or reasonable. My Y-DNA haplogroup result is "I" (from FamilyTreeDNA) - which therefore suggests a Scandinavian or Germanic origin - probably then Norse "Viking" - as I come from the NE of Scotland.

Date MtDNA Test Was Ordered: October 2002

Comments: Eliza Jane Noe, born ~1730, Tennessee. We have many circumstantial reasons to believe deeper Norman/Scandinavian ancestry, but no current proof. My Y-DNA haplogroup is "I" - I have 4 12-marker matches with surname, Sutton & a 5th match with "Lisle" - we all have substantial paper trails to Norman/Scandinavian ancestry. To date, I have no exact 25 marker matches (FTDNA). My paper trail "switches back & forth" to Scandinavian & Frankish ancestry in the 8th Century (if I can believe the historical data in that era). My mother's paper trail leads to Normandy, via surnames Cherry (de Cheri) & Byrom - Cherrys were Huguenots who fled to Ireland in the 16th Century. I'm waiting for DNAprint results to arrive. I'm currently searching for Eliza Jane Noe's ancestry.

HVR1 MtDNA Results: 16162G, 16519C

MtDNA Haplogroup per HVR1 Results: H1a

HVR2 MtDNA Test Results: 73G, 263G, 309.1C, 315.C

Date MtDNA Test Was Ordered: 4 March 2001

Comments: Initial test results assigned me to mtDNA Haplogroup H. Additional subclade testing in the summer of 2004 refined my mtDNA Haplogroup assignment to H1a. My Maternal Haplogroup of H comports with my genealogical research which indicates a European direct female ancestor. My Y-DNA Haplogroup R1b also comports with my genealogical research indicating a European direct male ancestor. My DNAPrint Test Results were surprising with results of 79% European and 21% Asian. These surprising results are being further investigated as part of my PA German Ethnic Group DNA Project: <http://www.kerchner.com/dnaprint25vs20.htm>
