Testing Company Used: FamilyTreeDNA

HVR1 MtDNA Results: HRV1 results were 16298C, 16362C

MtDNA Haplogroup per HVR1 Results: V

HVR2 MtDNA Test Results: HRV2 results were: 72C, 263G, 309.1C, 315.1C

Date MtDNA Test Was Ordered: June 2005

Comments: My earliest known maternal ancestor is my great grandmother Mary Ann McGuire, born c. 1871 in County Donegal, Ireland . She died in Brooklyn, New York, in 1899. She married a man with the same surname (John McGuire) also from Donegal, in 1895, in Brooklyn. The family believes they were distant cousins. My grandmother was also named Mary Ann (called May or Mamie) McGuire. My mother is still living at 90 years of age. There are plenty of female descendants of Mary Ann McGuire to ensure that the mtDNA will go on for the foreseeable future (oldest 90, youngest 1 year). I knew where my oldest known direct line Maternal ancestor came from. But I was interested in learning where they had been before they were in Ireland. Finding that I'm in the small Haplogroup V, and where this group originated, has opened a whole new area of reading and research for me. And - it's hard to explain in writing - but my mtDNA origins make complete sense to me.

HVR1 MtDNA Results: 16298C

MtDNA Haplogroup per HVR1 Results: HV

HVR2 MtDNA Test Results: 72C,263G,309.1C,315.1C

Date MtDNA Test Was Ordered: 27 October 2004

Comments: My traditional Genealogical research indicated that my maternal lineage was from Ireland. Tracing down the maternal line, always staying with a female ancestor the furthest my traditional research goes is to Mary Swift. She was born February 1827 in Parish of Kil Tarten, County Galway, Ireland. She and her family--identities unknown--said to have come to America during Irish Potato Famine of 1840's. She married Dennis Carey in Hartford, Connecticut in early 1850's. She 21 October 1919 in Chester, Howard Co., Iowa. Mary (Swift) Carey's haplogroup seems

to indicate--if I am interpreting it correctly--that my maternal lineage originates in Scandanavia.If this is correct it is very much of a surprize as I expected to find a Celtic origin.

MtDNA Haplogroup per HVR1 Results: C

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: NOVEMBER 2005

Comments: I was surprised to found out to have a "C" - that belongs to Amerinds in the Caribbean, because we had considered ourselves fully Europeans descendants. My mother's line is extreamly "white" (pale color), blond and often green or blue eyes. Many of my relatives are even "red haired with frekels" often called "Irish". We had never heard anything from an old "indian ancestor". Always had been told about French, Italian and Spanish ancestors. I confes, with all my respect to anyone, that if I got that "C" , I got it, but never expected. I was told in school that "natives or indians (as we call them here)" were almost exterminated by Spaniards, and very few "indian" blood could be found in this Island, in contrast to any other latinamerican country. Tha's why the slaves were brought here. I knew some people who proudly say they had an "indian ancestor - Taino". I knew my great-grandmother Gregoria Anglerau Gutierrez. She was born in PR around 1885. She was the daughter of Isaias Monserrate Gutierrez. As far as family stories tell, Isaias was the daughter of a spanish lady, and had also a sister. Isaias's mother separated from her husband, because he liked "slave women". Isaias mother kept Isaias and her husband the other girl, who she never saw again. Today, the population here is almost "mixed" (white and black). My family belongs to a small portion of the population - who considered pure "European - White" descendants... a group that is extreamly prejudised with "coloured" people as they referred to "mulatos", but . Is not so "wrong" to mention to have an old "indian ancestor". This why I do not understand why we never knew about having that heritage.... despite you can't tell or find any physical resemblance. I write to the Genographic Project for any explanation for that "C" and the posibilidad of inherited in any other way. I'm still waiting for a reply. But as far as I know that I only had Spanish, French, Italian and even English" ancestors. I'm also an enthusiastic of the Genealogy, so after many years studying all my lines with my father, I never found anything about this "indian" ancestor. But anyone who's willing to look for answers is not allowed to be shocked by any finding"

MtDNA Haplogroup per HVR1 Results: H

HVR2 MtDNA Test Results: 93G, 263G, 315.1C

Date MtDNA Test Was Ordered: 26 July 2005

Comments: *m = Sarah Ann (XX); b 1908 DeWitt Co, IL; d 1975 Starke Co, IN. Her oldest known direct-line male ancestor (my ggg-grf) was b 1753 in Ireland; the corresponding female was b 1760 in Germany. *grm = Laura H. Cook; b 1874 Clay Co, IL; d 1955 Porter Co, IN. Her direct-line male grf was b 1812 in Germany (Prussia); the corresponding female was b 1809 in Germany (Prussia). *g-grm = Adeline Lewis; b 1855 Clay Co, IL; d 1910 Clay Co, IL. Her direct-line male gg-grf (and his wife) track to the 1720s in NC. *gg-grm = Jerusha Erwin; b 1818 IN; d 1859 Clay Co, IL. No further data yet re her origins. * I fully expected my MtDNA haplogroup to be the H it is. * My Y-DNA haplogroup is R1b, SNP 25+, tested by FTDNA and "agreed" upon via both RelGen and Whit's estimator (R1b = 58; Q = 47). I'll be further refining/defining the R1b. My oldest known direct-line male ancestor, ggg-grf George W. Fletcher, was b 1790 in KY/VA/NC. I suspect, but haven't yet validated, Scots-Irish heritage for him.

Comments: Ancestral line goes back in a relatively small area in North Lincolnshire, England.

Names (with dates of birth) have been: Mother (name omitted as requested above) 1911, West

1884, York 1859, Wood 1833, Nassau 1795 (often written as Nussey), Bristow 1760, Sowerby 1726,

Richmond 1703, Sowerby 1666, Harrison about 1630 etc. My Y-STR results are online in ysearch

Y8BX3, and under Johnson in DNAHeritage. I have 47 tested Y-STR markers. Recent SNPs by

DNAH and EA place my male line as R1b3* with SNPs down to S21 ancestral (negative).

Comments: Elizabeth Daniel, born Aston/Burston near Stafford in c.1780, Staffordshire, England - subsequent descendents (until 1900) were based entirely in Stafford. The indicated ethnic origin therefore points to England. Elizabeth Daniel(b~1780)> Elizabeth Horne(b1805)> Emma Brown (b1838)> Ann Bickley(b1860)> Gertrude Pickin(b1898). My Y-DNA results were R1b indicating probable ancestry from the English/Scottish Borders, and possible Rhineland tribal origins sourced from the European Alpine Celtic Halstatt culture, which itself came from the Spanish Refugia. The relatively low incidence of Haplogroup V also indicates an maternal origin in NW Spain.

Comments: I know my grandmother came from near Michalovce. Her maiden name was Ferecik. My great grandmother probably came from there. As far as I know, her maiden name was Bajusal. However it's not a common Slovakian name I don't think. My grandmother's side was Greek Catholic so I'm not sure if they were Ruthenian or Slovak. My mother and an aunt had quite reddish hair with blue eyes (all). I'm probably the giant woman of the whole clan--5'3" so we didn't tend to be tall on mom's side. I'm just really interested in finding out what all the mutations means and so on.

Comments: MY MATERNAL SIDE HAILS FROM NORTH CAROLINA.(TARHEELS) I AM AFRICAN AMERICAN WITH NATIVE AMERICAN ANCESTRY. I ALSO HAVE EUROPEAN ANCESTRY. MY MATERNAL SIDE ACCORDING TO RESEARCH AND ORAL HISTORY WERE OF AMERICAN INDIAN DECENT. MY OLDEST TRACEABLE FEMALE ANCESTOR WAS A KILA/SUSAN ASHE BORN ABOUT 1827, AND WAS LISTED ON THE 1850 CENSUS AS A FREE PERSON OF COLOR IN GUILDFORD, NC. I AM NOT SURE WHAT TRIBE SHE BELONGED TO AND WILL NOT SAY CHEROKEE SINCE EVERYONE CLAIMS THAT. THERE WERE OTHER TRIBES IN THE AREA THAT WERE DISBANDED AND RELOCATED. SOME LIVED AMONGST AND INTERMARRIED WITH BLACK AND WHITE AMERICANS. THEY HAD NO CLASSIFICATION FOR AMERICAN INDIANS AT THAT TIMES SO THEY WERE LISTED AS MULATTO, WHITE OR BLACK (COLORED) AT THE TIME. THIS IS WHAT I FOUND ACCORDING TO MY RESEARCH. MANY OF MY MATERNAL FAMILY MEMBERS WHERE LISTED AS MULATTOS WELL INTO THE 1930'S AS WELL AS COLORED AND BLACK. SO MY HAPLOGROUP A DEFINITELY CONFIRMS THAT MY MATERNAL SIDE ARE DECENDANT OF A FULL BLOOD FEMALE NATIVE AMERICAN ANCESTOR. I HAVE ALWAYS PARTICIPATED IN MY NATIVE AMERICAN CULTURE SINCE I WAS YOUNG AND HAVE ALWAYS KNOW MY FAMILY WAS OF AMERICAN INDIAN AND AFRICAN AMERICAN DECENT. I HAVE ALSO MAY HAVE TRACED MY MATERNAL MALE LINEAGE TO THE CHOWANOC INDIANS OF GATES COUNTRY NORTH CAROLINA THROUGH MY GGGgrand FATHER HENRY BENNETT BORN 1810, LISTED AS A MULATTO. (RED,BLACK,& WHITE) ALL AMERICAN!!!

Comments: Mary GRANT (I think this was her maiden and married name) was born circa 1795-1797 in Scotland (according to Pedigree Resource File on Familysearch). She died sometime after 1871 most likely in Charlottenburgh Township, Glengarry County, Ontario, Canada. She was the wife of John GRANT who was born circa 1791-1798 in "Upper Canada" (Ontario). He died sometime in November 1869. They lived in Charlottenburgh Township, Glengarry County, Ontario, Canada. I can't prove yet who her parents are. The GRANT families of Glengarry are United Empire Loyalist families, who emigrated from Inverness in Scotland to New York State and then to Canada during the American Revolutionary War. John & Mary GRANT are the parents of Sarah Jane GRANT (usually known as Jane), born in 1823 in Cornwall Township, Stormont County, Ontario, Canada or Charlottenburgh Township, Glengarry County, Ontario, Canada (two different sources). She was baptised on 22 October 1823 at St.Andrew's Presbyterian Church in Williamstown, Glengarry County, Ontario, Canada. She died on 5 October 1893 in Williamstown, Glengarry County, Ontario, Canada. Her husband, James Alexander "Sandy" DOW is buried at St.Andrew's Churchyard in Williamstown but I am unsure where she is buried... (On Familysearch she is also listed as Sarah (Mary) Jane (Jean) GRANT, but most records list her as simply "Jane"). James & Jane (GRANT) DOW are the parents of Mary Ann DOW, born in 1858 in Charlottenburgh Township, Glengarry County, Ontario, Canada. She was the wife of Daniel WOOD. She died accidentally on 30 April 1905 at her daughter's house in Eamers Corners, Stormont County, Ontario, Canada. Daniel & Mary Ann (DOW) WOOD are the parents of Alice Dow WOOD, born 31 December 1884 in Potsdam, St. Lawrence County, New York, US (her family moved around a lot). She was the wife of Arthur SHIELLS. She died 7 June 1959 at home on the 3rd Line, Stones Corners, Grenville County (or Leeds County?), Ontario,

Canada. Arthur & Alice Dow (WOOD) SHIELLS are the parents of my maternal grandmother, Margaret Janet SHIELLS, born 28 May 1918 in Brockville, Leeds County, Ontario, Canada. She was the wife of Alva Samuel EASTMAN. She died at the Civic Hospital in Ottawa, Ontario, Canada on 17 July 2001.

Comments: My earliest know maternal ancestor was Eliza Hardy, born ca 1815 in Cmbridgeshire,

England. She had a daughter, Elizabeth Fyson, born 1837 in Ely, Cambridgeshire. Her daughter, Ellen Martha Georgina Willmore was born 1876, in Bexleyheath, Kent. Ellen married John Carney and emigrated to Winnipeg, Manitoba, Canada, where my mother and eventually, I was born. In terms of my results, I was pretty well resigned to the fact that my DNA would likely be mostly European, and it is. However, belonging to Haplogroup I is almost mystical news. For years my mother and I have been fascinated by the migrations of the Cro-Magnons and their beautiful cave paintings at Lascaux and Pont de Chauvet in France. We have visited them whenever we have visited Europe. Now I realize that those amazing paintings were created by my very own maternal ancestors! Gives me goose bumps.

Comments: Margaret (Knight)Talling b. Cornwall,England ca 1791 d. after 1881 same place; her daughter Mary Ann (Talling)Crane 1829-1887 Cornwall, England; her daughter Mary Ann (Crane)Gorringe b.1863 London England, d. 1923 Canada; her daughter Lillian b.1890 Sussex England, d. 1963 Canada; her daughter (my mother) 1913-1978 Canada; myself born Canada. One guess is that the Talling name may have come from Estonia, after the capital city Tallin - just a guess I believe. Cornwall England is the oldest known place of origin. Believe the general look is mostly blue eyed, fair skinned, but hair varies from dark to light and some females had strawberry blonde hair. As far as actual results, showing the U-group stopped around Finland/ Estonia 55,000 years ago, I was disappointed that it didn't continue on to show the line going into British Isles or wherever it went from there. The Genographic project only asked as far back as my grandparents' information which leaves a large gap to connect. I now have a designation, but I am no wiser as to what it means.

Comments: The above HVR1 and HVR2 results are from a Y-DNA 37 marker test which included the MtDNA test of Donald Walker. His late mother was May Allen/Allan who said she was from Scotland, however her birth said to be June 1912 has not been found registered under the name and dates she gave, in either Scotland or England. Possibly registered with a different name and/or different date. May died in 1978 in Sussex,U.K

Comments: Maternal line is Irish immigrant in the 1850s. Margarat Green b.1835 Cashel, Co. Tipperary, Ireland. Arrived Port of New York April 1853. Maternal line is Green-O'Brien-Adams-Wright. In this case the results were absolutely NOT a surprise, as this line is well documented. (I strongly suspect it to be associated with the Potato Famine.) I've given the classification the tongue-in-cheek label H1bernian.

Comments: Maternal ancestry is English, Irish/French Huguenot, Scot-Irish and Scottish. The earliest person in my maternal line that I have documented did not immigrate from Ireland with her husband and children and was probably deceased by the time they immigrated to the Carolinas in the mid-1700's. Her husband's line is believed to be French Huguenots who came to Dublin from France in the early 1600's. It is not known if she was of French Huguenot descent or Irish descent (or possibly something else but I would guess French Huguenot descent).

Comments: My oldest known direct line maternal ancestor was Elizabeth, wife of Hugh Conn. Her last name is unknown. Elizabeth was born between 1770 and 1780 in Pennsylvania. She died between 1840 and 1850 in "probably" Hamilton County, Tennessee. She had previously lived in Knox County, Tennessee. Her husband, Hugh Conn, was born in Virginia between 1760 and 1770. He died in Knox County, Tennessee in the 1830's. I am descended from Hugh and Elizabeth's daughter, Elizabeth Conn, who married David Alexander. I believe the Conns were Scottish.

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: August 2005

Comments: The earliest name listed on my maternal chart is Mary Seletta Farmer, born in 1826. She died in Blanco Co. or Fayette Co., Texas in 1870 or 1871. She married Eli Washington Dodgen, son of Eli Dodgen, Born 1790 in North Carolina and died 1860 in Georgia. Christiana Narcissa Dodgen, born in Georgia, September 12, 1854 (or died). Christiana married Joesph Dorris Bird, in Blanco Co, Texas. (I have heard that Christiana had firey red hair, leading me to believe she was of Scots-Irish descent). She died November 19, 1924 in Tucson, Arizona. My maternal grandmother, Bertha Stella Bird, born February 10, 1888 in Round Mountain, Texas. Awh died July 1961 in Phoenix, Arizona. My Y-DNA signature (performed by OxfordAncestry is as follows: DYS 19 (14); DYS 388 (12); 389i (10); 389ii (17);390 (23); 391 (10); 392 (13); 393 (13);

425 (12); 426 (12). The earliest ancestor is listed as Reuben May, born September 24, 1776 (no birthplace noted), died October 21, 1833 in Jackson, Tennessee. His first wife was (?) Lee (?). His second was Elizabeth (?). His son (which woman was his mother???) was Robert May, born in 1794 in Franklin Co., North Carolina. Robert died in March 1869 in Jackson, Tennessee (where he is buried in the May Cemetery). He married Nancy Hill, who was born c. 1800 in Albermarle, South Carolina. She died c. 185- and is also buried in the May Cemetery. Their son was William Benjamin May, born June 4, 1836 in Franklin Co., North Carolina. He died May 10, 1887, and is buried in the East Laurel Cemetery in Jackson, Tennessee. He married Mary William Johnston, born October 1840 in Jaackson, TN. She died December 1895 or January 1896, probably in Jackskon. Randolph Hill May was born November 30, 1881 in Jackson, TN. He died September 3, 1945 in Vernon, Texas (buried in Eastview Cemetery). On September 13, 1907 he married Flora Myrtle Savage, born March 28, 1883 in Personville, Texas. She died May 15, 1962 in Fort Worth, Texas, and is also buried in Vernon. The family supposedly immigrated from England, probably as indentured servants, and the name could be of Norman origin. However...the people around Ennistymon and Corofin, in County Clare, Ireland, look a whole lot like this side of my family. I was told I belonged there when asked who my family was.

Comments: My greatgrandmother was Honora McHale of north County Mayo, Ireland in the Lahardaun area. Honor (Nora) married William McHale (her maiden name was also McHale). Her daughter, my grandmother, was Bridget Alice McHale. Her daughter, my mother, was Lenore Gilroy Oliver. I do not yet know the names of Honor's parents. Honor was born around 1860 and came to Luzerne County Pennsylvania in the USA around 1884. She and William married in Wilkes Barre and lived in Avoca, Pennsylvania. Honor had a sister Bridget McHale Quinn who lived in Cuilnakillev on Lough Conn very near to Lahardaun. Bridget also emigrated to the US and lived in Avoca, PA.

Comments: My earliest known direct maternal ancestor is Bridget Conlon who was born in Kiltimagh, County Mayo, Ireland in 1867. She was about 5 feet tall and she had very pale blue eyes. She came to the USA in the 1880s and spent the rest of her life in Chicago in the "back of the yards" (a neighborhood behind the stockyards). Her sister was Nora Conlon Costello, who also lived in Chicago. Bridget's daughters were Mary and Loretta McNicholas. I have only begun researching my mom's family and will update my information if I can go back further down the maternal line.

Comments: Oldest known female ancestor was born in New Mexico, around 1870 and her name was Maria, maiden name unknown (I am still searching).She died around 1920 in the town of Maxwell, New Mexico. My grandmother (Marquez) was born about 1893 in Lincoln, New Mexico and died in 1991 in Pueblo, CO. My mother was born in Maxwell, NM also. My ydna tested through my brother revealed R1b (western European), possibly Spain. I was only surprised that my female ancestors are Haplogroup B, predominately of the American Southwest, and remained in one area for a significant period of time. I have been able to confirm that with census

information. I thought we had more hispanic (Spanish) maternal lineage than native american of the southwest. I also thought my maternal lineage could have been from one of the native american tribes in Mexico. Needless to say, my DNA or your DNA is very fascinating!

Comments: Family Lore - I am the nine generations from my oldest known Maternal ancestor, Abigail Nichols, who was supposedly "rescued" as an infant from an Italian seaport suffering with plague circa 1730 by a twenty something American mariner named Jonathan Boughton.

According to lore, her family "willing" placed her in Jonathan Boughton's care. They married circa 1750, and lived in the towns of Simsbury, Stanford, & Hartford, Connecticut. They had six daughters and three sons. A woman from West Virginia is my closest mtDNA match, and claims a somewhat similar story that her oldest known Maternal ancestor came from a Marseille seaport. Since 8% of Hvar Island in Croatia are also in Haplogroup F, I wonder if there is some connection there. My sister and her two daughters represent the only trace of direct lineage that I can find after extensive research of Abigail's female descendants. I suppose that since I share the same

haplogroup with eurasians and southeast asians, I was initially surprised, because all of my ancestry can be traced to the British Isles with the exception of my oldest known maternal ancestor. I logically assume that my maternal ancestors somehow came to the Italian seaport by the Silk Road of China. Pictures and documents will attest that five maternal generations show for short, very sturdy women with rather small craniums and tiny facial features. Blood Type O Positive. Born with olive complexion, light brown to blonde hair with blue eyed as infants growing into somewhat tanner complexion with dark hair and hazel eyes as adults. Extensive research has been conducted on my yDNA which is haplogroup G2, I am eleven generations from my oldest known Paternal ancestor named Richard Hildreth, who came to Chelmsford, Massachusetts circa 1635 from Gainsford County Durham, England. Most of the men in my family appear to be of average height 5'9" born with an athletic build with fair complexion, blonde hair, blue eyes, type A positive blood, and grow up to look fairly much the same aside with different hair colors. Not that the y-chromosome retains many physical traits that science can confirm. It is my understanding that both these haplogroups are uncommon if not rare, and I wonder if a caucasian like myself could be granted minority rights under such pretenses. Most likely not I imagine. j/k

Comments: The last female ancestor I have a record of and a name for is Eliza Eleandor Mares (1807-1878) b. New Bern, NC and died in Dale, Alabama. She was the daughter of Dr. Joseph Mares. Her mother's maiden name (Mrs. Mares) is unknown to me. The mother of Eliza is our missing link. Eliza married a second time to Reverend John L. Oliver, Jr. about 1867 after her first husband, Beasor Barrow, b. 1800 in NC passed away in 1861 in Alabama. Some believe this Mares line to be from France. It is "possible" that they were in VA early on in North America's history. SN in SC

Comments: Comments: 1)Marie Louise LECOUTRE, born abt 1648, France indetermine, died aft Jul 12, 1708, 2)Marguerite Louise Marie CREVIER, born bef 1667 lieu indeterminee(au Quebec), died unknown 3) Marguerite BAUDET, born Nov 5, 1687 in Cap-de-la-Madeleine, Quebec, Canada, died Jan 26, 1768 in Chambly, Quebec, Canada, 4)Marguerite PAQUET LARIVIERE, born Oct 17, 1718 in Montreal, Quebec, Canada, died Feb 24, 1784 in Chambly, Quebec, Canada, 5)Marie Anne BESSETTE b. Jul 29, 1747 in Chambly, Quebec, Canada died Oct 25, 1815 in Chambly, Quebec, Canada 6) Felicite FOURNIER, b. Oct 16, 1784 in Chambly, Quebec, Canada d. aft 1832 in Quebec, Canada, 7) Marie Louise DUBUC, b. abt 1806 in Quebec, Canada d. after 1880 in Chicago,Cook,Il, USA (as far as I know) 8) Julie TRUDEAU b. Nov 28, 1846 in Chambly, Quebec, Canada d. Mar 11, 1920 in Chicago, Il USA, 9) Julia GAGNER b. Aug 14, 1873 in Quebec, Canada d. Feb 2, 1946 in Chicago,Cook, Il USA, 10) Eleanor Morissette, b. Oct 14, 1896 in Chicago,Cook, Il USA d. May 14, 1974 in Sullivan, Il USA, 11) Grace (mother) b. Mar 31, 1919 in Chicago, Cook, Il USA d. Jul 28, 2001 in Winfield, Dupage, Il USA. Ethnic origin is French to my knowledge. Had curiosity rather than expectations. Always felt that we are all related, either close or distant. The only surprise was how many different nationalities and ethnic groups shared the same mtDNA sequence. If we share the same common ancestor then why are we always fighting? Guess the Abel and Cain story explains that. This also means that the "pure" bred ethnic groups aren't so "pure" bred. From what my genealogical research has determined, I came from some very strong, determined, brave, intelligent women at least back to around 1700 or so, for which I am grateful. Who knows what the prior women were like, but, pretty sure they were very strong, determined, brave, intelligent women. I had determined that Alsace, France is where my ancestors had originated, so was not surprise to see that this Country is listed in my mtDNA results. There are approximately 65 Ashkenazi entries under comments in my mtDNA results which upon research indicates Hebrew woman as part of my ascendancy. That kind of "kills" the "pure bred" theory. Found a couple of (not exact HVR2) matches with me based on Haplogroup H only results. They both had too many of the same surnames (male and female) in their lines not to have some connection to me. Received the HVR2 results and they did match (however, not exactly). In summing up, this is really fantastic to research.

Comments: My uncle has done an extensive family tree. Maternal roots date back to England and the name Wrenn. I believe he has traced the maternal roots as far back as the early 1600s. I am white with ash blonde hair and hazel eyes. My grandmother had the same coloring however her fraternal twin had dark hair with brown eyes as does my mother and all my aunts. All of my maternal relatives live in Virginia and have been traced to the Mayflower. All of my maternal relatives are VERY independent and most are still living in their 90s.

Comments: I have traced my mother's line back as far as I could. The earliest maternal ancestor I am aware of to date is Mary Elizabeth Thompson (born circa 1818 in NC or KY). Thompson is such a generic name it is hard to determine ethnic origin other than that she was probably British. She married Robert Bennett Starkey (born circa 1814 in Madison County TN) in 1838. They had at least eight children. Her daughter Prudence Pearlee Starkey (born September 1853 in TN) married Thomas Laird Marsh (born 19 June 1851 in Chatham County NC) in 1871 in Madison County, TN. They had approximately eight children. Her daughter Effie Hackney Marsh (born 24 July 1882 in Gibson County TN) married Oscar Lee Penney (born 25 May 1884 in Madison County TN) on 25 December 1904 in Gibson County TN. Their daughter Martha Laverne Penney (born 26 August 1907 in Gibson County TN) married Edmon Otis Ing (born 28 September 1907 in Gibson County TN) on 3 May 1930 in Hernando MS. Their only daughter was my mother, who is still living.

Comments: My oldest documented maternal ancestor was Bridget Kellam, born sometime around 1826, spouse of James Kellam; we do not know her maiden name. According to family stories, she came from Fermanagh, Ireland, arriving in the U.S. sometime between 1850 and 1854. She lived in Wilmington, Delaware. Her Irish-born daughter was Ann Kellam, b. 1845, married Edward McGinnis; her granddaughter was Mary McGinnis, b. 1883. I have communicated with two other people with this particular set of mutations -- both had Irish ancestors -- and there is also a citation in the Cambridge Concordance (Cortes-Real, 1996) of this particular sequence being found in Spain. I would love to know the connection!

Comments: Most distant known maternal ancestor was Marguerite Gorman, b. 1829 in Genesee County, NY, d. Linn County, MO, 1888 and was married to Jesse W. Thornton. May have been a granddaughter of Mercy ___ who married Abel McKain. Charity McKain could have been a maternal aunt. Marguerite was reported to be Scotch-Irish. Her daughters included Mary Ann Thornton (who m. Ellis W. Buser), Christina Thornton (who m. William H. Ranch), Helen M. Thornton (who m. James A. Calhoun) and Sarah M. Thornton. Mary Ann's daughters included Jessie Buser (who m. Levi Kinsey), Nellie Buser, Margaret Iva Buser (who m. John Smith), Sadie Buser (who m. John Rowan) and Gladys Buser (who m. Jesse Hendricks). I would expect all of the above females to have the same MtDNA.

Comments: My brother had his mtDNA tested by Family Tree DNA. He is in the Katrine Haplogroup. He currently has over 100 HVR1 matches in the FTDNA database but no HVR2 matches. My brother and I trace our direct maternal line back to Ireland in the mid-1800s. My great-great grandmother, Mary Diana FLYNN, married Patrick KELLY ca 1850. According to Mary Diana's obituary, she was born in 1823 in County Galway in Ireland. Patrick was born ca 1825 or 1826. They migrated to the United States before 1859. Patrick bought land in Fillmore County in Minnesota in the United States in 1859. My Great-grandmother, Margaret KELLY, was their daughter. She was born on a farm near Chatfield in Fillmore County, Minnesota in 1861. Patrick and Mary Diana's other children were: Anna, Michael, Peter, Thomas, Mary and Ed KELLY. Patrick KELLY died in 1893 in Portland, Oregon. Mary Diana FLYNN KELLY died Dec. 27, 1903 in Deer Park, Washington. I don't know the names of the parents of Patrick KELLY and Mary Diana (FLYNN) KELLY. As a result, I don't know any maiden names of my maternal ancestors earlier than the FLYNN surname, but presumably they lived in Ireland. My Great-grandmother, Margaret KELLY, married Joseph Patrick GALLAGHER, from Winona Co., MN on July 27, 1885, either in MN or in Minnehaha Co., SD. Joseph Patrick and Margaret KELLY GALLAGHER lived in the Humboldt, SD area the rest of their lives. They had two children. Their son, George Gallagher, was born on May 13, 1886. Their daughter, Mamie (my grandmother), was born on Nov. 3, 1887. My Kelly and Flynn ancestors lived in Fillmore Co., MN before moving to Minnehaha County and McCook County, SD in the late 1800s. They farmed near the towns of Humboldt and Montrose in SD.

Comments: My maternal great grandmother's name was Catherine Pierce. She and two older sisters came to New York sometime between 1860 and 1864 from Ireland. We do not know where in Ireland they were from other than a vague reference to the north in things said. My great grandmother married Thomas Cunningham and they lived and raised a large family in Philadelphia PA.

Comments: It is obvious the Eliza Ann Hall 1820-1897 did everything possible to conceal her origins. She claimed to have been born in Grove, KY. There are several Grove, Kentucky communities, none of which seem obvious as correct. The one in Whitely Co. KY seems near Melungeon territory and did have an interesting family of Halls that broke up about the time Eliza Ann appeared in Spencer, Indiana in 1838. The 1830 census gives a daughter for that family that could match Eliza Ann. I also believe that Eliza Ann, her husband, Orren Gallup, and her oldest daughter passed through Cairo, Illinois on their way to somewhere south and west in the 1850s. She appeared ordinary caucasian in photos but her children and grand children had a dark exotic look not attributable to husband.

Comments: I can trace my maternal ancestors to Hani Mandel, born 1790 in Nagy Karoly, Hungary now known as Carei, Romania. Her daughter Betty Neufeld was born abt, 1815-1820 in Almosd, Hungary. My great-grandmother Regina Grunstein was born 1840 in Bihar, Hungary and her daughter Frida Breuer was born 1873 in Bihar, Hungary now Biharea, Romania. My mother Iren Gottlieb was born 1909 in Brad, Hungary now Brad, Romania. Frida Breuer Gottlieb emigrated from Hungary to NYC in 1911 with her 4 daughters to join her husband Mor Gottlieb and her sister Roza Breuer Kraus and brother Ignatz Breuer. Their family was Jewish and I was surprised to find 10 DNA cousins from Eastern Europe and Germany in Haplogroup I among the Irish, English, Scottish and Scandinavian families.

Date MtDNA Test Was Ordered: April,2005

Comments: My paternal GGGrandmother was said to be full blood indian born in the State of Mississippi, believed to have lived on Choctaw Land near the Yalobusha River, the test was taken by the oldest female direct line descendent of her, and the results showed West African region and that the line is "unique" and "very rare", according to the top Researcher in the World on "L3f haplogroup research", native american ancestry can not be ruled out, and this is the first time that he has seen the sequence listed, and that it is older than any DNA groupings that is known. We are desiring further information on this and is this proof enough of the Native American Ancestry and how we can get it documented and with whom, since many still do not use DNA as proof. We were also recently told that this haplogroup could go back to the Lineage of "EVE's" seven daughters in Africa and it is aboriginal native decent. Any suggestions, all are valuable and desired. And thanks in advance, intently waiting for your responses.

Comments: All I know for sure is that my great-grandmother was an orphan, born in Santa Barbara, Calif., in the 1880s, who was raised by two women in Ann Arbor, Mich. My mother was always told that she was half-Chinese, half-Spanish (i.e., Mexican), but her race was listed as Colored or Negro in Dayton, Ohio, vital records (where my grandmother and mother were born). The HVR1 haplogroup results would seem to confirm the racial classification in the vital records, but does not disprove what my mother was told.

Date MtDNA Test Was Ordered: April 2005

Comments: My oldest known maternal ancestor is Vincenza ("Vinci") Donzelli (maiden name) Giardina (married name). She was born in Comiso, Sicily, in the late 1800's. She died in the late 1960's in Syracuse, New York. Vinci was my maternal grandmother. She was married to her uncle, my grandfather, Vincenzo Giardina, for whom she was named. Her husband/uncle was Vinci's mother's brother. Therefore they both share the same maternal ancestor...Vincent's mother, and Vinci's grandmother. Needless to say, the multiple familial "positional" relationships I share with my grandparents are interesting, to say the least! I had no expectations, but a great deal of curiosity, about what Haplogroup I belonged to...my grandfather Vincent had fair skin, greyish eyes and brown hair; his niece/wife had dark brown eyes, brown hair and darker skin than Vincent's. Of their four daughters, three (including my mother, who is still living) had fair skin, brown hair and greyish eyes. One daughter shared her mother's coloring. My maternal grandmother told my mother that we have some distant Greek ancestry and possibly some North African/Arab ancestry. My own bone structure is closer to African proportions than Caucasian

proportions. I share my mother's coloring, although my eyes are hazel like my father, and my skin is darker. (My father was English, German, French, Black Irish/Welsh/Scottish, and Dutch). Haplogroup U seems appropriate...directly out of Africa, through the Sinai and along the Fertile Crescent, ancient and the precursor of other haplotypes.

Date MtDNA Test Was Ordered: Jan 2004

Comments: the maternal line, all mothers, are Eva Scott(b.1900 died 1953, heart attack); Etta Mae Taylor(born 1882 died 1945), Permelia Smith (born 1859 died 1941), Margaret Jane Carle (born 1837 died 1920) and Eleanor Bird (born 1795 died before 1885). The Scott family was Schott back in germany. On the paternal side, the Knapps and backward, they are not typed as such , but most closely resemble the YDNA haplogroup, R1b.

Comments: My oldest known maternal ancestor was Flory McCallum, born around 1780 in Ardchattan parish, Argyllshire, Scotland. No parents found in records. Next came Isabella McIntyre (1816-1890); Flora MacNiven (1849-1947); Flora Menzies (1889-1972). All these people were born in the Highlands of Scotland, as were their husbands. Because many in this family had "Asian" slanted eyes and looked almost Japanese, we expected an Asian connection, and were surprised not to get one. The family did claim to have Pict ancestry -- but I don't know how they could prove that!

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: March 2005

Comments: Earliest known non-living maternal ancestor is my greatgrandmother, born in about 1862, Stuttgart, in Germany. Her name was Maria Wern and she came to this country and settle in Akron, New York, about in the 1880s. She married a man named George Braun (Brown) also from the same part of Germany. They stayed in Akron, New York, all their lives and Maria died about 1960. She had 8 children, tending quite tall and quite dark. Some of the girls were teased for being "colored." My grandmother was her daughter, Hilda. Born about 1903. She died in 1970. We, the younger generations, had some speculation about whether the family was originally Jewish, since in retrospect, Maria Brown observed some Jewish customs in slaughtering and preparing meat. Also, there was the fact that some of Maria's daughters were teased for being "colored" because they had kinky hair, somewhat African facial features, and were rather dark. There was nothing else to support this idea, however. When I found out my haplogroup was U3, I see that some associate this was Iraqi Jewish population, some tribes in the Caucasus -- but I do not know whether these facts are connected.

Comments: This is an update from the earlier posting below. Earliest traceable line is to a Cattarina (or Catrina) who married an Israel in about 1777 in Raus Parish, Sweden. (surnames are irrelevant historically that far back since in each generation the children usually took their father's first name and simply added "son" for sons and "dotter" for daughters at each generation - only individual parish records can sort it out, ie Israels's sons were Israelsson and daughters went by Israelsdotter until the next generation used that sons first name as the last) All maternal descendants' husbands were in military or fishermen. All in southern Sweden (Kristianstad) until migration to US in 1895.

Comments: Ruth Gwaltney, born Obion Co, TN, 1895, Cary Bell Thompson, born Lake Co, TN, 1872, Ellinor Jane Davis, born 1838, Hickman Co, KY, Ann Harry, born 1805, Marlboro Co, S.C. I do not have this line documented beyond Carrie Bell Thomson. It would appear that the Harry family came from Wales. I was very suprised at the haplogroup and therefore had it tested twice with the same results.

Comments: Oldest maternal ancestor:Manuel Valdez b.1785 d.1848 Chiquimula,Guatemala Oldest maternal Sephardic Jewish ancestor:Julia Machorro b.1859 Chiquimula,Guatemala My maternal ancestors were Portuguese and Spaniard. A lot of the information I found was thru interviewing the oldest family members and I also found many of my ancestors at FamilySearch.org and Sephardim.com and their links. Discovered that one of my great,great,great uncles' from Spain, arrived in Guatemala from Cuba, fell in love and stayed in Guatemala.

Comments: Jane Orr Campbell born April 5, 1828 in Mississippi (possibly Choctaw Co. Ms.), Died Nov. 3, 1911 Belton, Bell Co. Tx. married John Thomas Ward son of Wm. Thomas Ward and Sarah Ross who married 1810 in Monticello, Jasper Co. Ga. they also lived in Tuscaloosa Co. Al. and Choctaw Co. Ms, La.,Hempstead Co. Arkansas and then into Tx. Jane Orr Campbell and John Thomas Ward are parents of Matilda Frances Ophelia Ward born July 20, 1851 in Rusk, Cherokee Co. Tx. married James Riley Ross born June 15, 1843 in Alabama (probably Tuscaloosa Co.), their daughter Susan Emma Shutler Ross married Dec. 25, 1889 in Bell Co. Tx. Jesse Monroe Bounds born 1866 in Yell Co. Arkansas. died Nov. 8,1906 in Bell Co. Tx. their son Warren Debs Bounds born Sept. 26, 1910 Bell Co. Tx. I am Debrah Modrall granddaughter of Warren Bounds whose mtdna results are here. I had always heard there was Native American ancestry in our family but (I guess) according to this test, it is not so.???? Warren Bounds also had

a DNA test done at "Ancestry By DNA" out of Florida which showed his Ethnic origin percentages to be 73% European and 27% East Asian. I find this very confusing! What can you tell me? Thank You, Debrah Modrall

Comments: My maternal great grandmother was Sevilla Higgs, I think her maiden name was Roberts and she came from The Bahamas. I do not know if my "Eve" was a native person of the Americas or a European. If I am from the native peoples then they would be Ojibwa, Yakima,

Sioux, Natook or the Na dene speaking people of the Navajo tribe. If I am from the Europeans, then I was told by a professor helping me, they would have been from somewhere in Great Britain, probably Ireland. I am from African descent also, so I am totally confused. Any help would be so appreciated. Feel free to email me if you can offer any insight.

Date MtDNA Test Was Ordered: March, 2005

Comments: Britta Mouncedatter, born about 1627 in Sweden, died 1724. FTDNA indicates that I belong to haplogroup U5. I thought that the combined HVR1 and HVR2 tests would be more specific as to the country or specific region. Not that I was expecting pinpoint specificity, but my Y-DNA37 indicated a paternal line almost exclusive to Ireland and Scotland, and so in similar fashion, I expected that the extra HVR2 test would identify a region of Europe.

HVR2 MtDNA Test Results: 93G, 263G, 315.1C

Date MtDNA Test Was Ordered: April 2005

Comments: My oldest confirmed matrilineal ancestor is Susannah LNU, whose surname was probably Vardeman. If so, she was very likely to have been the daughter of William Vardeman and Magdalena Petersson, both of whom appear to have been born in Sweden about 1700 or slightly before. They married in Delaware in 1720. Susannah was born about 1737 and married James Shelton. Their daughter Letitia Ann Shelton (abt 1780 - 1846) m. Charles C. Duncan; their daughter Sarah C. Duncan (1808-1886) was impregnated by James Wiley Taylor; their daughter Mary Elizabeth Duncan (aka Tully) (1823-1871) m. Philo Ceylon Beeman; their daughter Mary Savilla Beeman (1845-1893) m. John Nicholas Kealy; their daughter Sarah Inez Kealy (1874-1974) m. James Coke Mayes; their daughter is my mother. Based on the relatively uncommon 93G mutation in HVR2, I suspect this is Haplogroup H3. Another possibility is H13. I will probably order the H-refine testing from FTDNA at a later date.

Date MtDNA Test Was Ordered: April 2003

Comments: Great Grandmother's maiden name:J.Harris, (I don't know if that's her real name-you would think a Greek would have a Greek name). She lived,married in Baltimore,MD,died in Phila.in 1926.All here kids look and act kinda different from everyone else maybe because they're Greek or something.I really don't know what the case is -I'm still finding out myself.I'm not surprised about my results,I'm just glad I can finally know for sure who these people are.Maybe your ethnic group should acknowledge that you're related-you can't be Greek or German all by yourself.And all Germans aren't PA German,the U.S. Census lists them as two distinct groups.

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: Feb 2005

Comments: Oldest known direct maternal ancestor: Mary Ann Crisp Petty Busch. She was born in Texas. Her mother was born in Georgia. Her name might have been Nancy Jane Strawn, but I'm not sure. I had understood that she was of English heritage. There was also information that she might be of Native American descent. If so, it was not through her maternal line. The mtDNA results placed us in the I Haplogroup with 129A, 223T, 391A, 519C mutations. This suggests western European origins.

HVR2 MtDNA Test Results: Was tested. No Mutations

Date MtDNA Test Was Ordered: January 2004

Comments: Maternal line goes back to the Hage family, Swiss Germans from the Zurich area going back at least 300 years. They were Amish Mennonites and emigrated to the United States around 1885. Maternal Clan HV falls in line with what I expected, as this is one of the oldest European Clans. Mother's male line goes back to Mid-Wales. My Y-DNA is R1a1. Father's family is almost totally English in descent. I would have predicted R1b, and the actual results speak of a Viking past, which is actually not surprising if you knew my family. We are a family of North Western European origin, with no exceptions, and the results have fallen into line with what I would have expected.

MtDNA Haplogroup per HVR1 Results: R

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: 15 December 2004

Comments: Maria Barbara Martin-Serrano is the name of my 6th great grandmother. Maria Barbara was born a subject of the Spanish crown in the modern USA state of New Mexico, in the mid 1700's. Her ethnic group she belonged to was the Spanish colonists of the American Southwest. She was born and raised in the area called Santa Cruz. The Y-DNA results indicated that I descended from the I haplogroup. My paternal and maternal ancestors have been in New Mexico since the late 1500's. They arrived in Northern New Mexico in 1598 to set up the 1st provincial capital in the Northern Spanish Empire. Up until 1821 my ancestors were Spanish citizens of European decent. In 1821, when Mexico gained independence, we became part of the Republic of Mexico. In 1846, under U.S. General Kearney, my ancestors became American territorialist when the modern day state of New Mexico was annexed to become U.S. territory. In 1912, New Mexico was finally granted statehood.

Date MtDNA Test Was Ordered: March 2005

Comments: My maternal line was in Appalachia in the 1700s-- apparently of Scottish/English origin. Earliest proven maternal ancestor is Arie Barnes/Barron b. about 1815 (Georgia) d. at age 99. Her mother was Winia Barron, b about 1794 (Georgia) (maiden name unknown but hypothesized as Qualls/Quarles), wife of Isaac Barron b. 1793. Arie Barnes married Alfred Parks. (Her sister Elizabeth married Linchfield/Linsfield Parks.) Two daughters of Alfred & Arie, Emily

(my gr-gr-grandmother) and Elizabeth married brothers, George Henry Corn and Jesse Marion Corn. They escaped the Civil War to settle in Kansas. My gr-grandmother was their eldest child, Mary Ann Corn, who married James Taylor. They settled in Washington state. Their daughter was Julia Taylor, my grandmother. I didn't have any expectations about my Haplogroup, so no surprises, except that I have not matches at all even at low resolution. I would have expected to be pretty generic.

Comments: My GG-grandmother was Roxalana Armstrong, b24 Dec 1832, Wash. Co. Ohio, d18 Oct 1906, Toulon IL. From census reports I found her mother's name was Loanna born in Canada around 1811. I know her father was Irish and they lived in New York before moving to Ohio. Loanna is my brick wall hoping to find some info. My maternal line: Loanna 1811 Canada - Roxalana Armstrong 1832 Ohio - Loana Grubb 1871 Illinois - Zana Brooks 1905 Illinois - my mom (living) - me

Comments: Comments: This line goes back to Anna Apollonia Heckman, born 07 Feb 1691 in Herxheim, Bavaria, Germany. The females of the family are then found for several generations in Hatzenbühl, Bavaria, Germany. The line was traces through the records of the Roman Catholic

Church there and transcribed by Herr Albert Weigel. The married names after Heckman are Siegel, Flick, Adam, Brehm, Persohn, and Schmitt. I notice that the mutation at 16221T is rare, so far only shared by this line and that of Ms. Velten, contributed recently.

Comments: The first known ancestor on my mother's line was Catharina Volk who was born ca. 1822-24 in Meiningen, Sonnenberg, Saxe-Coburg, Gotha, Germany, and she came to NYC in 1849, and died in the 1880's. She married a man named Johannes Liebermann of Saxe-Coburg. My mother's ancestry on her MtDNA lineage is predominately German, but she did have some Angol-Irish lineage through the Holton family also. My Y-DNA haplogroup is R1b, the lineage goes back to Languedoc, France ca. 1630.

Comments: My Maternal Mothers 1:..Susanna Luellen Malcoh..b. 1728 Lunenburg, Va. d. 1776.. Lunburg, Va 2:..Elizabeth Farris..b. 1760 Lunenburg, Va. d. 1805..Lunenburg, Va. 3:..Agnes Penik (Pinnick) b. 1784 Stanford, Ky. d. 1875 Lincoln Co. Ky. 4:..Lucinda Gooch b. 1818 Lincoln Co., Ky. d. 1897 Lincoln Co., Ky. 5:..Long Rebecca Long b. 1855 Lincoln Co. Ky. d. 1941 Lincoln Co., Ky. 6:..Ida Harris b. 1880 Lincoln Co., Ky. d. 1960 Lincoln Co. Ky. 7:..Lula Oaks b. 1901 Richmond, Madison Co. Ky. d. 1976 Ripley Co., In. I was a little surprised about beening a U2 Haplogroup. Most of my grandmothers were direct decendents of the Royal houses of England and Europe. The U2 group as explained where from the Near East and India. The group is over 50,000 years old. My frist thoughts where that they where descendants of the Aryan race that came into Tebet right after the sinking of Atlantis. With the mutation of 16129C, which says that the race of people were white and not found in India, only in west EuroAsia, (Iran, Persia, etc...) Still waiting on the YDNA test, which is due the 13th of March.

Comments: I did not know my mother as I was adopted at an early age by my paternal grandparents. My mother was from the Sinclair/Rawlins Wyoming area. She was born about 1924 and her name was Theil Hazel Anderson. Her mother was also from the same area and was Hazel Elnor Williams. She married Carl Arthur Anderson and his parents spoke both Swedish and English according to the 1920 U.S. Census Her mother was reported to be from Spain and spoke both Spanish and English according to the 1920 U.S. Census. She may have ben born about 1880. There may have been a Spanish speaking influence from the days of the Lousiana Purchase which included Wyoming as we know it today.

Date MtDNA Test Was Ordered: December 2004

Comments: Oldest known maternal ancestor is Susanna Anhaus of Duhren,Baden Wurttemberg, Germany. She was born about 1719 and married in 1739 in Eschelbach,Baden Wurttemberg, Germany to Johann Christoph Suss. They were listed as Protestants on immigration records. They left in 1752 on the ship Upton that sailed from Rotterdam to Charleston SC by way of England. The British were encouraging settlement of German protestants in certain areas. They settled on Crim's Creek outside Pomaria SC. They were given 250 acres and a cow.

HVR1 MtDNA Results: ??????

MtDNA Haplogroup per HVR1 Results: H

HVR2 MtDNA Test Results: none

Date MtDNA Test Was Ordered: january 2005

Comments: All I got from these guys was Haplogroup H. I have a HVSI sequence which has a difference from CRS at 16304 but I don't know what that is. (first hypervariable region it says. Is this HVR1, I guess? That is the only red letter in that sequence so would it be 16304- but no letter. What is the letter for I see C, G T, on other peoples reports?). I also have an electropherogram, but no interpretation. Lots of red letters but no interpretation. The report also said something about the presence of an Alu site loss at np 7,025. ?????? Maybe I should have gone with familytreedna? Any recommendations? My grandmother was at least part Irish(Mc Bride), her mother was named Gray (named a son William Wallace, so I would venture Scottish) and her mother's name was Fox. Texas, Okla, New Mexico, back to Virginia (or W. Virginia) at least back to the late 1700s. I don't know anything before that.

Date MtDNA Test Was Ordered: 16 Dec. 2004

Comments: Grandmother, Eva Lucina Bigelow, 9 June 1888, her mother, Alice Bettes, 1849, her mother, Ewer or possible Elwer. (No expectations here.) The Y-line was much easier, added 200 years and 6 generations, almost immediately after finding the surname had been Royce, prior to Rice! (In 37 markers I am only off one marker, one repeat, from the Robert Royce ancestral haplotype! (No surprise there, I had figured it out about a week before the results came back! Then the mutation sent me off on a wild goose chase for a few months, until we figured out that the mutation, matching another Robert Royce descendant, was simply an unlucky coincidence! We descend from Robert by different son's of his! Other descendants along his line do not carry the mutation, nor do other's along my line of descent!)

Date MtDNA Test Was Ordered: November 2004

Comments: My grandmother was Ethel Boze, born 1918 in Hopkins Co.,Ky. Her mother was Beulah Fox, born 1886 in Hopkins Co. Ky. My results were pretty much what I expected. My YDNA results were much more interesting! Our haplogroup is J2. My paternal line dates back to David L. May, born 1802-06 in Ky. With no know Jewish or Middle Eastern ancestry, I ordered a SNP test. We tested M172+ for J2. I have since learned that it could be the result of neolithic expansion.
