HVR1 MtDNA Results: 16224C, 16234T, 16311C, 16519C

MtDNA Haplogroup per HVR1 Results: K

HVR2 MtDNA Test Results: 73G, 114T, 263G, 315.1C, 497T

Date MtDNA Test Was Ordered: November 2006

Comments: The oldest known direct line Maternal ancestor is my mother's mother, Chana (aka Anna and Hannah) Berliner nee Bower. Documentary evidence shows that she was married in Tashkent, Uzbekistan (then Russia). The ship's manifest for her travel to the United States shows her home town also as Tashkent (though written "Tashkin.") One of my hopes was that I would be able to determine if this Maternal line was of Bukharian descent rather than Ashkenazic. I have been informed that there is not yet a Bukharian genetic database through which this determination could be made. I am hopeful that it will happen sooner rather than later. I am still waiting for the results of the Y-DNA tests.

Date MtDNA Test Was Ordered: November, 2006

Comments: Elizabeth Giddings, B in England, January 3, 1804, D. December 14, 1852 in Jefferson Co., Illinois. May have come to America Abt 1817, not sure. Her father was John Giddings B abt. 1770 in Wiltshire, England and D. 1824 in Washington Co. OH. I have all this as second hand info, and it has not been verified by myself. But I did get a DNA match to someone who shows the same family tree so I would assume that it is correct.

MtDNA Haplogroup per HVR1 Results: N

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: May 4th 2006

Comments: My mother's, mother's, mother's, mother name was Molly Jones. She was said to be one of the first settlers of a town named Jonestown, MD. She was married to Jake Jones. I thought she was of the Native American ethnic group. I took two Y DNA tests. The first test was 24 markers results was Q strong. The second test was 44 markers results R1b medium. Didn't expect my test result to change from Q to R1b, My STR values are very close between Q and R1b. I could only find 37 markers that I could compare and Q is 1 number more than R1b. Q 45 -R1b 44

Date MtDNA Test Was Ordered: July 2006

Comments: Last known direct maternal line ancestor: Violet Davidson, born in Pennsylvania in 1875. Violet had a sister named Lillie (or Lilly) Davidson. Her father's name is Joseph Davidson, and her mother's first name was Mary (I don't have Mary's maiden name, but she was born in the US, probably Pennsylvania or Ohio) Violet married William K Donahue and had numerous children. Family notes indicate that most of family lived in Pennsylvania, Indiana, Ohio, and New Jersey. I am not sure how long her family had been in the United States.

Comments: My maternal ancestors originated in Ostfriesland. The oldest known direct line maternal ancestor is Hille Gerdes, b. 4/23/1755, d. 1/9/1817 both in Bagband, Ostfriesland, Kingdom of Hanover (now a part of

Germany). This community is in northern Germany near the border with the Netherlands. Many people from this area originally came from the Netherlands. The names associated with this maternal line are Gerdes, Aljets, Keiser (Kaiser), and Willms. The earliest of these ancestor to immigrate to the US was in 1848, living in and around Fosterburg Township, IL and Moro, IL. Some later moved to central Kansas in the vicinity of Great Bend, KS. The testing for HVR1I was done later by Relative Genetics and they give a predicted haplogroup of U.

HVR1 MtDNA Results: 16519C

MtDNA Haplogroup per HVR1 Results: Hg H

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: August 16, 2006

Comments: My mother's pre-marriage name was Ashkenazie. Her parents emigrated to the US in about 1895 from Russia. Her name was Frieda Ashkenazie when she was married to my father, and I believe she was born in New York City in 1907 or 08. I have NO idea of the name of the town in which her parents lived or were born in Russia and no idea of my grandmother's pre-marriage name, or the names of my great-grandparents. My maternal grandparents claimed to be Jewish and spoke only Yiddish at home. My maternal line however, may not be Jewish in origin. This is because, as a HG H group member, I clearly have ancestors who migrated West to Europe tens of thousands of years before the "Jews" who became Ashkenazie Jews in Europe migrated from the Middle East one or two millenia ago. I am therefore more closely related to non-Jewish Europeans than to Jewish Europeans, as more than 50% of European Ashkenazie Jews are in Hgs K and Nb1. (See Doron

Behar paper in the AJHG.)More than 40% of non-Jewish Europeans are in HG H.

Date MtDNA Test Was Ordered: July 2006

Comments: This is a follow-up for "Anna," dated Sunday, August 06, 2006) I had another cousin tested. She was the granddaughter of Ida Albertine Caroline Pautz, born in Regenwalde, Pommern, 15 June 1877, and great-granddaughter of Albertine Nassa Hansel Pautz. This cousin matched Anna (as expected), but she did not

have the heteroplasmy characteristic. Her 16093 marker was only 16093C. I was told that heteroplasmy usually develops in a single generation, then the marker becomes fixed one way or the other. So 16093 C/T (16093 Y) seems to show up in one branch of cousins (Anna), but not the other.

Date MtDNA Test Was Ordered: August 2006

Comments: My oldest Maternal ancestor was Mary Casey Wonders born about 1857 in Illinois, both her parents were from Ireland, but that's all I know. She married my Great Great Grandfather George Wonders about 1876 and their family was recorded in the 1880 census in Indianapolis, Indiana, as having two children, Alice Wonders born September 9, 1877, my Great Grandmother and Hester Wonders, my Great Great Aunt born 1880. Mary Casey's husband, George's family were both from Germany, though he was born in Indiana. Though the haplogroup I belong to "K" also shows that I belong to three of the four founding mothers of Ashkenazi Judaism, I have no family history of Judaism, but am intrigued. Mary Casey, who I know so little about, married her second husband, a man named Rosenberg some time after my GGGrandfather's death in 1913. I do not know anything about him or their relationship and would welcome any help or information.

Comments: This is my brick wall; my mother was born in 1925, but I do not know who her mother was, but have been told that she was Maud(e) C. Quigley, born 1885. I can't help but notice that my HVR2 results are similar to C. F. Kerner's and my HVR1 are similar to his second example in that group.

Date MtDNA Test Was Ordered: August 2006

Comments: I am a first generation American; both of my parents come from Europe. My mother was born in Heilbronn, Germany (1934); purportedly able to trace her German ancestry back to the 1600s through church documents, etc...my father was born in Roumania (1926), but of Greek heritage; his parents were from the Ionian islands of Kefalonia and Ithaka.

Comments: Francisca Hernandez Barroso, born in the Canary Islands, Spain, in the 1850s. Emigrated to Cuba, married and gave birth to Andrea Pimienta Hernandez. I had no idea what the haplogroup would be. I thought it could be something like U6b or J, reflecting the pre-Hispanic Berber inhabitants of the islands, but ,obviously, her maternal ancestors went from Europe to the Canaries, most probably during the Spanish settling of the islands. My paternal haplogroup, also from the Canaries, is R1b1, found all over Europe. Email address (To use delete '-Saturday-' and add @ sign in that position): tpmn4u-Saturday-aol.com

Comments: MitoSearch.org ID is YUKSQ. Evoline G. Davis, born 26 Sept 1824 in TN & died 25 Dec 1893 in Blount county, TN. Daughter of William D. Davis & wife of Hugh Henry Gamble, of the Henry/Gamble clan of Blount & Sevier counties. The Henry clan has been extensively tested and results suggest that they are closely related to the Henry & McCain families that originated in the Bann valley of Northern Ireland. This Davis family appears to have entered East Tennessee in a southern migration down the Valley of Virginia. Evoline G. Davis is my paternal grandmother's direct maternal line ancestor (results came from testing my father). My grandmother was born near Ellejoy, Blount county, TN in 1891, near the Sevier county line. Many of the tombstones in the cemetery at Ellejoy Baptist Church mark the graves of Revolutionary War veterans. When I checked last 10 years ago, the tiny church was still active.

Comments: Mitosearch.org ID is MABKF. Nancy Benson born circa 1780 in Spartanburg county, South Carolina. Spartanburg was formerly within the boundaries of Tryon county, which encompassed all or part of five counties in North Carolina & eight counties in South Carolina until it was abolished in 1779 at the onset of the American Revolution. John Tagert was the first sheriff of Tryon county, & all available circumstantial evidence suggests that my known & proven direct paternal line ancestor James Tagert was closely related to this John Tagert. The lion's share of my ancestry can be traced to the area encompassed by a circle drawn with a 150 mile radius centered at present day Charlotte, NC (the Carolina piedmont) in the decade preceding the American Revolution The lion's share of surnames in my pedigree are Scottish or Ulster-Scot (Scotch-Irish) & all known surnames are of British Isles origin. Of lines tested so far, four YSTR lines are R1b (S21+x1 & R1b1c*x3) & two mtDNA lines are hg T2 & hg V.

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: March 2006

Comments: My mtDNA test results in Haplogroup K are a TOTAL surprise to me!! I have a good "paper trail"

of my maternal line back to my 2g-grandmother, Nancy Alexander. For Rachel Morgan and her mother Rachel, I have only oral family history. Barbara Jean McNamara (me!) - b. 1938 Mobile Co AL - living Eva Claudine L----- - b. 1912 Mobile Co AL - living Lottie Deloras Collins - b. 1887 Mobile Co AL d. 1972 Margaret Baptiste - b. 1848 Mobile Co AL d. 1911 Nancy Alexander - b. 1820 Monroe Co AL d. 1920 Rachel Morgan - b. ?? (d/o Rachel and Unknown Morgan) d. ?? Rachel - b. ?? d. ?? (family history says Rachel was Native American, perhaps Creek?) Rachel Morgan married Obadiah Alexander (no record found). Obadiah was from SC and they show up in Monroe Co AL on the 1830 census. By 1840, they have moved to Mobile Co AL. Rachel Morgan Alexander is not on the 1850 Mobile Co AL census with her husband, so we assume she died in Mobile Co between 1840-1850. Our family history is that Rachel was a Native American who had a child, Rachel Morgan (we have no idea who MORGAN was). When I submitted my DNA for testing in the Genographic Project last March, I learned I am in HVR1 Haplogroup K. This result was a real shocker!! Some of my male ancestors were from VA, TN, KY, NC area, and in my research I had run across references to the Melungeons who inhabited that Cumberland Plateau. I found that COLLINS (my grandmother's maiden name) was listed as a Melungeon surname. However, my grandmother's father was the COLLINS...not her mother. My mtDNA result is coming through Rachel (the Indian woman), her daughter Rachel Morgan, then to Nancy Alexander (my 2g-grandmother). I do have some of the physiological characteristics that seem to be passed on through the lines of some Melungeon descendants: 1. Ridge on the back of upper teeth 2. "Sleepy eyes" 3. Vitiligo Since my results revealed I am Haplogroup K, I am trying to learn more about the Melungeon people who apparently were Portuguese who arrived in America in the 16th Century and married into Native American families. Could the fact that my mtDNA is showing I am Haplogroup K be due to a Melungeon female ancestor?

Date MtDNA Test Was Ordered: July 2006

Comments: My ggggrandparents, Johann Heinrich PLUMER (1795-1883) and Maria Martha Henrietta GELTHAUS(1798-1859) emigrated with their children to Missouri from the area near Diepholz, Germany (west of Hannover, Germany) around the 1840s. They died in Mills County, Iowa, just south of Council Bluffs. When they arrived in the US, they switched surnames. They were known in Germany as Johann Heinrich GILDEHAUS and Mette Maria PLUMER. Both of Maria's parent's surnames were PLUMER. Her mother was Anna Margarethe Christine PLUMER who was born in 1773 in Jacobidrebber (10.7km from Diepholz) and died in 1843 in Dakau (probably Deckau as 13.6km from Diepholz). Maria's grandmother was Ilse Maria TEISINGT (1730-1805). Ilse died in Jacobidrebber. My paternal BENO line shows Haplogroup G2. My oldest ancestor is Jean BENO, born about 1736 in Wangenbourg, Bas Rhin, France or Switzerland and died about 1801 in Romanswiller, Bas Rhin, France. His grandson, Bernard BENO, born in 1812 in Birkenwald and died in Portland Oregon in 1898, emigrated with his family to St. Louis, MO in 1853. The Birkenwald civil records of births show Bernard's children with BENO and BENNO spellings.

Comments: I am an H6a following the H-Subclade test. Adopted at birth: 1961; Washington DC Birth mother claimed English/Irish descent. I have an exact match with another individual who claims his maternal line has been in Upstate New York for many generations. He claims his maternal Country of Origin before the US was the UK. Individuals of his maternal line are: Elizabeth Cole b. 1898 (?) Anna Smith b. 1864 Nancy Crawford (?) At this time, ancestry for H6 at its most recent appears to be Slavic; it is stated that H6 is not a true Western European maternal line but perhaps West Eurasian-Central Asian in origin proceeded by origin in the Near Middle East. Testing through another company I had 10 matches all off by 1 marker in: 3 Slovenia, 2 South-Southwest Russia (area between the Black Sea and the Caspian Sea), 2 North-Central Poland, 1 Former Northern East Germany, 1 Switzerland, and 1 France. There has also been an implied connection with France. The H6 designation was a surprise. In my research I am also finding individuals of jewish ancestry as H6

Comments: My maternal Great Grandmother was Dora (Dvoire, Dwaine) Boroskin (Bobruskin). She was born in Russia in 1865 and died in Brooklyn New York in 1930. She arrived in Ellis Island in 1912 with my Grandmother, Ida(Chaje)Boroskin Schwartz who was the youngest of her 6 children. My Great Grandfather, Jacov Morris Bobruskin, died sometime between 1894 and 1912. There is come confusion about their city of origin, since my Grandmother had always said she was from Kremenchug gubernia in the Ukraine, however the Ellis Island record lists Homel in Belarus as the city of prior residence. There does seem to be a large Bobruskin family from Homel.

Comments: Great grandmother Nancy Magouirk (Macgouirk) was born in Mississippi in 1849. There is family speculation that a male ancestor was Native American. She was the fourth wife of Nathan Butler, a Baptist missionary to the Chickasaw and Choctaw tribes who was born in 1832 in Howard County, MO and whom she married in Fannin County TX. They had two children - Elisha and my Grandmother Kareen, born on 16 December 1889 in Rubottom, Indian Territory, before Oklahoma became a state in 1907. Nancy Magouirk Butler died in Durant OK in 1904 or 1905. Kareen married Judd Moore _____ in 1904 and had 3 children, Cella, Zella and JL. Kareen died on 19 December 1969 in Duncan, Stephens Co. OK. I understand that the HVR-1 16288C is rare and I wonder what it signifies (geographically?). As of 21 August 2006 I have 6 exact matches in HVR-2. My Full Sequence mtDNA Coding Region Results are: 750G, 1438G, 3010A, 3745A, 4769G, 5460A, 8512G, 8860G, 11204C, 11914A and 15326G

Comments: My oldest known direct line maternal ancestor was Maria Giuseppa Buccino, who must have been a gypsy and must have been born in the early 1800's as her daughter, my great-grandmother, also known as a gypsy, was born in 1868 or 1869 and died on May 16, 1913 in Sao Paulo, Brazil. Maria Giuseppa Buccino is recorded in civil records as having lived in Sarconi, province of Potenza, in the Basilicata region of Italy, Maria Giuseppa Buccino's husband, Antonio Bottone, is described as gypsy in civil records. Moreover, another record mentions a certain Giuseppe Antonio Buccino as a gypsy born in Padula, province of Potenza, in the Basilicata region of Italy. As for my Y-DNA result haplogroup assignment I am definitely J1.

HVR2 MtDNA Test Results: 152C, 263G, 315.1C

Date MtDNA Test Was Ordered: 20 July 2006

Comments: I was curious about my paternal grandmother's mtDNA, so I asked one of her direct female descendants if she would be willing to be tested. I have not yet received a reply. However, my grandmother and her half sister shared the same mother, so they should have the same mtDNA. So, I had the half-sister's direct line tested. The grandmother of the person tested was called Anna C. Hansel, and also Anna C. Pautz. She was born 13 July 1869 in Regenwalde, Pommern, and she married Albert O. Bauermeister. My grandmother was Ida Albertine Caroline Pautz, born in Regenwalde, Pommern, 15 June 1877 (the product of her mother's second marriage to August Frederick Albert Pautz). Her birth information shows that her mother was Albertine Nassa Hensel Pautz, and we think Nassa was her maiden name. I did not know about "heteroplasmy," so the HVR1 result was a surprise - 16093C/T, also known as 16093Y

Comments: My oldest known direct maternal line ancestor was probably born between 1802 and 1812. Her name was Felipa Acosta. Her daughter, my fourth great-grandmother, was named Manuela Magdalena Salgado and was born about 1832 in San Antonio de los Banos, Habana, Cuba. She died on 18 Oct 1887 in Guanabacoa, Cuba. Her daughter was named Carlota Madrazo and she was born about 1860 in San Antonio de los Banos, La Habana, Cuba and she died on 23 Nov 1914 in Guanabacoa, Cuba. Carlota's daughter, Maria Luisa Isabel Gonzalez, was born on 02 Jul 1886 in Guanabacoa, Cuba and died in 11 Mar 1923 in Guanabacoa, Cuba. She died in an accidental fire she started when she fell asleep while smoking. I was not given a haplogroup assignment via Relative Genetics; however, I believe that my haplogroup would probably be primarily European.

Comments: Being told, since I was little, that I have Mohawk blood, I set out to find the individual. Research proved futile so I opted to go the DNA route. To my surprise there is no Indian ancestor! Even more surprising is the haplogroup J. My mother's maternal line dead ends with her ggmother; Nancy Longest b.?, d.?, m. Amos Willis Dec.8, 1856. Her daughter, Mary Rebecca Willis b. 5/13/1860, d. 1/21/1933, m. Eugene L. Taft. Mary's daughter, Susan Viola Taft b. 4/18/1888, d. 4/24/1975, m. Henry Edward Schell. Susan's daughter is my mother.

Date MtDNA Test Was Ordered: May 2006

Comments: My most distant Maternal ancestor is Jacqueline Leliot, born 1617. I don't know where, possibly France. Marguerite Laverdure, born about 1645, St. Nicolas des Champs, Paris, Ile de France, France. Died August 22, 1727 St.Pierre, Ile d'Orleans, Montmorency, PQ, Canada. Marie Crepeau, born March 11, 1668/1669 St.Familles, Ile d'Orleans, Montmorency, PQ, Canada. Died Nov.29, 1745 St.Jean, Ile d'Orleans, Montmorency, PQ, Canada. Marie Angelique Plante, born before 1695 Quebec, Canada. Died Nov.13, 1759 St.Charles, Bellechasse, PQ, Canada. Marie Catherine Leroux, born Nov. 27, 1720, St.Jean, Ile d'orleans, Montmorency PQ, Canada. Catherine Marie Genevieve Guenet, born Sept. 28, 1739 Beaumont, Bellechasse PQ, Canada. Agatha Gonthier, most likely Canada. Marie Clement dit Lamonte, most likely Canada. Marie-Anne Gosselin, most likely Canada. Marie Chabot, born in Canada. Marie Anna Nadeau, born Sept. 27, 1888, St. Damien, PQ, Canada. Died Nov. 12, 1954 Woonsocket, Rhode Island. I was surprised to find out I was Haplogroup T, I thought it would be H. I also have Native American, Mi'kmaq, in my ancestry but knew it would not show up because it passed from mothers, daughters to sons, and down to my grandmother. I will be doing alot of research to find out all about my T, and will be looking forward to finding distant cousins!

Date MtDNA Test Was Ordered: 17 October 2005

Comments: Tomasa Trejo is the oldest direct line born abt. 1850, died in Cuba. Oldest maternal line most likely descended from Spain. Descendants of Tomasa Trejo were Cristina Martinez born abt. 1875 in Las Villas, Cuba and Maria Gregoria Betancourt born abt. 1900 in Sagua La Grande, Las Villas, Cuba. Maria Betancourt's father was born in the Canary Islands (dont' know which Canary Island).

Comments: Oldest known maternal line ancestor is Mary Ann Foster, born circa 1808 in Northern Ireland, possibly County Tyrone. She married John Miller of County Tyrone. They arrived in Ontario, Canada circa 1842. John is buried in Carleton Co., Ontario. Mary Ann's date of death and place of burial is unknown. I'm guessing Mary Ann Foster was probably an Ulster-Scot.

Date MtDNA Test Was Ordered: March 2006

Comments: my great grandmother:" Mary " Tacee Weldon Gustoff born 1846 Wrangel, Alaska.Died 1918 Decatur Island, San Juan County, WA. Her ancestry is as follows: Tlingit raven clan frog family father: Jachesh Gustoff wolf clan mother: Hoodaye (Xo-daye) b. C1825 mothers mother: Gei-gi sister of Shakes III married Kah-xedji (Xah-xe-je) full blood Kuh-yash-kiditon clan of Stikine tribe mothers father: Kah-xedji (Xah-xe-je) of Kuh-jash-kiditon clan Stikine tribe mothers mothers mother: Kah-lyud of Teehitton Stikine tribe sister of Shakes II married Goo-glow, probable chief nanya-ayi clan of Stikine tribe mmmm: sister of Shakes I (Gusklin) of Niska Battle fame married (1) Haida chief (2) his nephew, marriage fails, returns home penniless to her tribe. mmmmm: Stikine Tlinkit wife related to Gukksh and Shaddesty who moved the tribe to Kotslitan. Marries Tongass chief The last would have been born about 1720-40. I referenced the spouses because I have no other identifying information. I knew my greatgrandmother was Native American, so that designation was not a surprise.

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: March 2006

Comments: My mother's gt grandmother was Sabry Gage, born North Carolina about 1804. She married Robert B. Davis 14 August 1829 in Rutherford County, North Carolina. A Jacob Gage was in Rutherford County in the 1830 North Carolina census. My hypothesis is that Sabry was the daughter of Jacob Gage who is listed by some family historians as marrying "Esther." So this is where the mtDNA stops at this point.

Date MtDNA Test Was Ordered: February 2006

Comments: Direct female ancestor, oldest first: 1) Jane HARKINS, b c 1789 SC, d ca 1864 TN, m Ephraim King; 2) Eleanor M. "Nellie" KING, b c 1824 TN, d 1892 Lincoln Co., TN, m William Sorrells; 3) Margaret T. SORRELLS, b 1846 Lincoln Co., TN, m Washington A. Gilbert; 4) Alice E. GILBERT, b 1867 Lincoln Co., TN; d 1919 Madison Co., AL, m Thomas Roberts Morton; 5) Gertie B. MORTON, b 1892 Lincoln Co., TN, d 1965 Shelby Co., TN, m Patrick G Kirkland; 6) my mother; 7) me. These families were early settlers of Lincoln and Bedford Counties, TN who came from Virginia and the Carolinas. I've gotten back about 14 generations on a few lines and have most back to at least 1700-1750. Except for a family from Switzerland, all my known ancestors came from England, Scotland and Ireland. All ancestors are "southern," that is, they came from Virginia and the Carolinas to Tennessee and other points south.

Comments: I come from a very diverse background. My father's family (paternal) is German from Bavaria, came to US in early 1800's settled in Alabama and Arkansas. Father's maternal side is from the area in Czech republic known as Bohemia , Ireland (Eamon Gray), and Blackfoot Indian. The families settled in South Dakota and Iowa then moved to Arkansas. Mother family (paternal) is English from the county of Dorset, and Irish, they came to the US in early 1700's settled in North Carolina, moved to Greenville County SC in early 1800's, family split and my relatives moved to East Texas in mid 1800's and also west central Louisiana. Maternal side is very dominate with Caddo Indian from Texas/Louisiana area, Scottish, and Irish. There may be some French as well.

MtDNA Haplogroup per HVR1 Results: J

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: 18 March 2006

Comments: I trace my maternal ancestors to the Azores Island of Faial off the coast of Portugal. My grandmother's maiden name was Martins. I believe the reason I'm in the J haplogroup which most middle easterners and 50% of Jews are in is due to the Moors who were Muslims and occupied Western Europe(Spain)for a 700 year span.

Date MtDNA Test Was Ordered: December 2005

Comments: Maternal grandmother was born in Pontiac, Michigan in 1912. Don't know where her mother was born, but could have been UK. I expected to be whichever Haplogroup was Celtic because the family came from Wales on both my mother and father's side. We have family history traced back to 850 A.D. in the area of Ruthin, Wales. (It appears that both my mother's and father's families are from neighbouring towns -- Ruthin and Holywell. We didn't learn this until very recently.) I was very surprised to be Haplogroup K, when it appears that Haplogroup I may be the Celtic line.

Comments: My genealogy on my mother's, mother's, father's side goes back for generations, but not far on my mother's, mother's, mother's side. I only go back to Sarah Ann Carlton, born 1853 in Richhill, Missouri, died 1942. Guess it is time to start working on her line since that is where my DNA goes!

Comments: maternal only NATIVE-AMERICAN - 23% INDO-EUROPEAN - 77% I was actually quite surprised to find so much Native American Ancestry on my mothers side. I have no info on my maternal side as I was abandoned in 1974, one year after my birth. I am mixed with(paternal Y Haplogroups) B-mostly Pygmy, E-Ethiopian, G-Syrian and G2-multiples, with G2 being the only subclad on my fathers side. Oh yes, I forgot about the Han Chinese lineage. Don't know how that happened, but I would guess my African/Egyptian ancestors went to China which I believe to be totally true, because I visited Ramses Temple(among others) on a 2001 trip throughout Egypt and I saw heiroglyphs of Egyptians fighting Karate style. I wonder who visited who first, the Chinese came to Egypt and taught Karate or the other way around? On my mothers side it's mostly Russian which I expected, Siberian, Lithuanian, Moldovian, Transylvannian(this one scares me...lol), Ukrainian, Polish, Romanian, Slovakian, Belarussian(Divin), Hungarian(Austrian), German, Irish, Dutch, Swiss, French, 20 unknown counts of origin and finally...whew....United Kingdom. I have also over 80 HVR1 mtDNA matches. The funny thing is about my appearance is that every racial group except White, thinks that I am one of them...lol. On both sides of my family I am mixed with just about every race on the planet except Japanese and Hispanic.

Comments: I dont know a lot about my mother, she was one of several girls adopted by a family in Mosul and is said to have been part of the Hijazi diaspora after or during the time of Laurence of Arabia. She had hoped that one of her adopted sister's adopted daughters would raise me, but this did not occur due to foul play. I am in the process of finding out more about my genetic roots to verify the various stories I remember about my early childhood and how I came to be where I am.

Comments: Earliest known direct line Maternal ancestor is Martha Waddell b. in 1804, probably in Hanover Co. Virginia where she later was married. I believe that her mother was probably Ann (Biggen) Waddell, the wife of James Waddell who was in Hanover County from ca 1790 until his death ca 1815. The population in this area tended to be from the British Isles. I match a person from England (Birmingham area) 6/6 and we are

both being tested for HVR2

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: Feb 2006

Comments: Haplogroup U5a1a: How do U5a1a arrived in Sicily. There are a number of reasons this mtDNA is found in Sicily. First, there is the melting pot aspect of Sicily. Haplogroup U is believed to be about 50,000 years old, entering Europe through the Near East. This is thought to have occurred somewhere between Turkey and the Ukraine - Black Sea. Members of U5 then quickly spread all over Europe, the first permanent mtDNA group to settle in Europe. The Roman Empire was very important across Europe and brought several various populations together, including the women and children of their Empire, the Vandals and Visigoths and other various 'barbarians' ('Russo') which would have included U5a1a populations.

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: November 2005

Comments: The information i have on my maternal ancestors i have found to be somewhat sketchy and based on the writings of mother's father before his death. My mother's mother was very ill most of her life and my mother was mostly raised by her mother's mother Lena Carolina Honholz, My greatgrandmother. Her maiden name was Finkensted. I am not sure of her place of birth. The best i can surmise is that she was either born in New York or Germany. According to my grandfather Lena's mother, Dora Finkensted was born in Celle,

Germany. I do not know her maiden name. I have been searching many web-sites for information on Lena and Dora and have found very little. My greatgrandmother had a stroke when i was 5 1/2 years old and was very active in are lives up until the time of her stroke and subsequent death. I do have memories of her. It was my understanding that "her people" were not originally from Germany. My mother would never talk about it and over the years I pretty much forgot about it until the time when I received my mtdna results. I do have some of Lena's possession's. One I find most curious is a toddler sized red tartan skirt that Lena made for my mother. I also wore it and so has my daughter. What i find interesting now is that my mother insisted that my daughter have a professional picture taken of her in that red tartan outfit. With our mtdna Haplotype I being very rare but found in the British Isles i am wonderering if that is what Lena meant when she said that "her people" are not originally from Germany. I have been researching web sites on line looking for information on my great-great grandmother and have found very little and am not sure wear else to turn. It's expensive to hire professionals for this task and still might not turn up anything. I would appreciate any suggestions or insights you might have concerning are Haplotype and research methods.

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: 15 December 2005

Comments: My results so far are what I had expected. My grandmother was born Gladys Constance Warren in 1896 in London, England. Her mother was born Alice Goding in about 1870 and presumably in England. Alice married William Warren. My yDNA matches suggest that I belong to Haplogroup R1b. For 12 marker exact matches I have 2 R1b which is all of the matches. For 11/12 matches (one step mutations) all 49 matches were R1b. For 10/12 (two step mutations) all 209 matches were R1b. For 9/12 (three step mutations) 337 were R1b and 1 was R1. Also, for 8/12 (four step mutations) 458 were R1b, 3 were R1, and 1 was R1b1.

Comments: The oldest known maternal ancestor know is my great-grandfather Edward Henderson. He married Sarah James and besides other children, they had my grandmother Ida Marie Henderson (born July 10, 1896). Edward's grandmother (my great-great-great grandmother) is said to have been from The Netherlands.I was surprised to find out that I have also German ancestry (via Austria) through my maternal line. I am curious to find out more about my HVR1 results which one sequence is 16519C. It seems to match a lot of German 'cousins'. I'm curious to find out more about my German 'roots' and where they may lead.

Comments: My mother's mother was Alberta Habgood, born 31/08/1886; her mother was Agnes Payne who came from Crudwell near Chippenham in Wiltshire England - she married Jesse Habgood in Cricklade, Wiltshire in 1853. I found a lot of information from the census taken around that time. The Habgoods moved to Finchley, North London and had ten children. Alberta married Bernard Campbell (Finchely) circa 1912. They lived in Richmond, Surrey and had four children. One of them was my mother who married in 1949 and I grew up in the south east suburbs of London. I came to New Zealand in the mid-70s and had three sons here.

Comments: My earliest known maternal ancestor was Nancy Ellet (Ellit) born about 1770 (It is believed to a Catawba Indian man and an English woman.) in Wilkes Co., NC. She married a French Huguenot, John Phillip WATERS, born about 1764 in France. Nancy died either in 1810 or 1815 in Wilkes Co., NC. See: FHL Film/Fische source call #6330325, "An Index to Marriage Bonds filed in the North Carolina State Archives" Marriage Bonds for the years 1741-1868 NC marriage bond county code: 104 = Wilkes Co. Bride list FHL Fiche 6330252: Durbin, Mary - Evens, Elisabeth Groom list FHL Fiche 6330325: Ward, Elihu W. - White, James Allen Nancy Ellet, 1st Spouse's children: 1. Rachel WATERS b: 18 FEB 1790 in Wilkes Co., NC (Has Children) 2. WILLIAM PHILIP WATERS b: 1798 in Wilkes Co., NC (Has Children) 3. Julie WATERS b: 1800 in NC (Has No Children) 4. James B. WATERS b: BET 1801 & 1807 in NC (Has No Children) 5. Thomas WATERS b: BET 1801 AND 1807 in NC (Has No Children) 6. Wilburn WATERS b: 20 NOV 1812 in Ready's River, Wilkes Co., NC (Has No Children) Note: Last two children, Thomas & Wilburn, may be Elisabeth's children. Either that or Nancy didn't die until between 1814-1815. It was said "John Water's wife died when Wilburn was between age 2 & 3". John P. Waters was described by Lewis Preston Summers in his book, Annals of Southwest Virginia as follows: "From the best information that can now be had his (Wilburn Water's) father, John P. Waters was a French Huguenot, who emigrated to America in early life, about the beginning of the present century and settled in South Carolina. He was a man of some education and liberal acquirements, of strong prejudices and passions, restless, reckless and fond of adventure. Being remarkably stout, fearless, and passionate he was considered dangerous when excited or laboring under a sense of injury, and was supposed by those with whom he communicated most freely, to have been a refugee from South Carolina, if not from France, from some cause he never revealed to others. He settled down, without any apparent calling, among the simple and obscure people on Ready's river where, after a time, he married his wife, the mother of Wilburn, who was a half-breed Catawba Indian. From what little history we have of the Catawbias, they were a small portion of the

tribe that inhabited Roanoke Island when Lord Raleigh took possession of it about the middle of the sixteenth century, and being dissatisfied with the encroachments and exactions of their new and powerful neighbors, they sought a new home among the mountains on the western boundary of the colony, where game was abundant, and the clear, bold streams afforded a plentiful supply of trout and other excellent varieties of fish . . . At the time John P. Waters found a home among them they were mostly half-breeds and quarteroons, with very few full-bloods, and the latter the aged members of the community. It is said they originally bore the name of Chowans, but after finding their way into the mountains they took the name of Catawba, the name by which one of the principal streams in that region was known. Wilburn's mother was one of these people, and was, as before stated, a half-breed. He is therefore, what is termed a quarteroon. She was said to have been very handsome, tall and straight, with nearly all the characteristics of a full Indian, except that she was unusually amiable in her disposition, and fond of quiet, domestic life, anxious that her children should have pious instruction and the best education their limited means and opportunities would allow. She was the mother of five children -- four sons and one daughter, of whom Wilburn was the youngest. She died when he was between two and three years old, and the only recollection he has of her is that she had long, glossy black hair, which she wore loose, and reached nearly to the floor when she stood erect. She died young, and her death was a terrible blow to her husband, who was warmly attached to her, and whose turbulent nature she could control with a word. Notwithstanding this attachment, and his apparently unsubdued grief, he soon married another woman, left the community and his children among their relatives, and was never after heard from by his family. . . Wilburn's first realization of the loss of his parents, and a circumstance that seems to have been burnt into his memory by bitter tears, was in being carried away on horse by a stranger, and adopted into a white family several miles away from the little circle he had known as kindred and friends. Of course the children -- even the oldest not being able to provide for himself -- became separated, and in the providence of God were never reunited as one family again."

Comments: I do not know any maternal history as I do not know who my mother was. I am as much as I know from the pacific north west. I would like to know if any one has done a study on blood types to compare to halogroups. I know my blood type being a more rare type comes from Mongolia.

Comments: Earliest known native (Micmac) maternal ancestor: Anne-Marie RIMBAULT, listed as Micmac/Metisse/Indian in Acadian Census data; she was married to French settler Rene RIMBAULT. This marriage occurred in Acadia Nova Scotia in the early 1600s. Daughter Francoise RIMBAULT married Charles GAUTROT, had daughter, Marguerite; Marguerite married Michel HEBERT, had daughter, Genevieve; Later, in 1755, after my family of that time -- Genevieve HEBERT now married to Michel DAVID with their children and other Heberts and Davids - was booted out of Acadia Nova Scotia by the Brits; they were exiled to Maryland (settling on the Eastern Shore) and 12 years later sailed to Louisiana; where the family line continued with the following Louisiana/Cajun/French surnames (OUBRE, GUINELLE-DINNELLE, GOSSELIN, GASCHET-DELISLE). I have learned that my mutations link me to the Haplogroup A A3 subtype, which is traceable to the Siberian-Arctic/Aleutian (e.g., Beringian)Indians. The Inuit (Thule) peoples are known to have migrated East from the Arctic Regions, crossing Canada, later dropping down into to New Foundland and Nova Scotia; hence the markers showing up in the Acadian Amerindian population (Micmac and Metis). The Siberian/Beringian and later Micmac Indian aspects of my mtDA lineage are intriguing to me. I had no knowledge of my Amerindian lineage before participating in the Genographic project; I was totally knocked out of my chair when I read the results on line. I've learned alot about my background since; and thankfully have met other folk who have helped me solve all these mysteries in my own family's background.
