FST MtDNA Coding Region (CR) Test Results:

Date MtDNA Test Was Ordered: 26 DEC 2007

Comments: My oldest known female relative is Anastasia (Nancy) Glouzewski (1900-1954) born and died in Buffalo, New York. Her mother was Rose (1866-1928), but I do not have her maiden name, she was possibly from the Alsace-Lorraine area of then Prussia, she spoke German and came to the United States in 1889.

FST MtDNA Coding Region (CR) Test Results:

Date MtDNA Test Was Ordered: Sept 2007

Comments: I know very little about my mother as I was adopted at 3 weeks of age, She told the agency she was Bohemian (Czech?)and Indian, I can only assume she meant American or Native American Indian. She came from Oklahoma was tall, over 6 ft, and slender. Her mother was said to have died in the early 50's of kidney cancer.

FST MtDNA Coding Region (CR) Test Results:

Date MtDNA Test Was Ordered: Jul 2007

Comments: My oldest proven maternal ancestor is Ann Mariah Parks, born in KY around 1812. I

suspect her mother may have been Rhoda Van Winkle, born 1766 in Essex Co., NJ, but have not been able to prove it. Rhoda Van Winkle's mother is said to have been Phoebe Carter, born about 1730. Ann Mariah Parks may also have been known as Maria Ann Parks or Ann Maria Parks. Ethnic origins would have been European, but it is unknown as to which area. The ancestry could have been English, Scottish, Welsh, Dutch or another European country.

Comments: Oldest known maternal ancestor: Helen Hudovac, b 06 May 1819 -- probably near

Vivodina, Croadia. Helen's daughter was Barbara Gusic Prebil -- also probably born near Vivodina, Croatia. Barbara's daughter was Jellica Sosterich. Jellica married a Ramuscak man. Jellica's daughter, my grandmother was Klara Brklje Ramuscak. Klara was born in Vuketic, near Vivodina in Croatia in the mid 1890's. Klara married in Ironwood, Michigan about 1914. Comments: Y-DNA from my brother: Haplogroup: E3a: M168, M96, DYS391, M2 My mother's maternal line can be traced to " Griffin & Eliza " born about 1805 and 1820 in South Carolina. On her father's side to " Jim and Plesant" who were born during the late 1700s in or about Elizabeth City, Virginia. As a child, I remember older relative saying our foreparents were beautiful people, being a mix of Native American, Caucasian and African.

FST MtDNA Coding Region (CR) Test Results:

Date MtDNA Test Was Ordered: March 2004

Comments: My great-great grandmother was Mary Bailey, b 1827, probably in Miss. She married Wm B Terry in 1845 in Itawambe co, Ms. Mary had a sister Harriet, 18, living with them in 1850 census. My great grandmother was Martha Julia Terry, b 20 May 1853 in Itawambe co, Ms d 11 Sept 1910, Springfield, MO. She married John Young Carney grandson of Richard Carney who emmigrated from Ireland in 1820. My grandmother, Effa Alma Carney was born in 1884 in Ms and died in 1907 in Mo of TB. She married in Benton Co, Ark. By 1910, Martha, and my grandmother's sister were all dead of TB, and my mother was 8 years old. She lost all contact with the family. She was always told however, that her grandmother was Cherokee. She searched for 20 years, and I searched the net and we found no evidence, thus the mtDNA. H3 is Iberian Penn, largely Basque and Sardinian today. I have found no records on Bailey or Terry before the marriage in Ms. Neither have other descendants. My autoaomal CNA shows only 2% NA and 3% SSA and a whopping 57% Middle East and SEEuro (Turkish/Greek/Italian). I was brought up Eng, Irish, Scots and German plus Cherokee. Mary Bailey couldn't be more English as names go. Maybe too English?? Every one of them is white on the census records, pointing the finger at the Terry/Bailey group for some of the more obvious signs. H3 would fit with a connection to people who fled the Inquisition. Terry is a Melungeon name. Some H3s did go up into the British Isles. I would love to know the whole story.

Date MtDNA Test Was Ordered: Sept. 2007

Comments: Afro-American testee here, who's FamilyTreeDNA certificate was generated Oct. 25, 2007. Actually receive my results uploaded online approx. 2 to 3 weeks before that date. AfricanAncestry labs have assigned my markers with the Fula ethnogroup of (eastern?) Guinea-Bissau. Oldest know maternal ancestress was Milly Woltz, who lived as bondswoman in Christianburg, VA (now Chase City). Here youngest daughter, Mary Elizabeth (Bette) was my maternal greatgrandmother & married to Greene Stinson of Stinson (now Durand) GA. Milly had 3 other daughters older than Bette: Nannie, Fannie & Ellen, all marked with the "M" under the Race column heading on the 1870 US Census sheets. She was supposed to have died in 1880 from measles in Merriwether Co. GA. Family Surnames: Ivory, Reese, Henry, Stinson, Moore, Woltz, Martin

Comments: Surname THURMAN, originated in Norway region; drifted down into England; came to America in 1600s/1700s; settled in TN and MO. Family surnames: THURMAN, CLASBY, THOMPSON, and GRISHAM. I had a paper trail from 20 or so years ago...at least as far as England. I was surprised to find that my deep ancestry line connects me to the Saami people in Norway/Russia area as far back as 8 to 10,000 years. This would be U5b1b group.

HVR2 MtDNA Test Results: HVR2 72C, 200G, 263G, 309.1C, 315.1C

Date MtDNA Test Was Ordered: HVR1 4/07, HVR2 5/07

Comments: My oldest maternal ancestor's name was Sarah Jane Herrington. She was born in the 1830s in Kentucky. She died in Pulaski Co., Kentucky. Her daughter, my greatgrandmother, was also born in Pulaski Co. KY and her name was Margaret White. She died in Westport, IN. My grandmother was born in Pulaski Co. Her name was Sarah Eliza Gideon. She died in Gary, IN. My paternal ancestors were Irish and so were the males on my mother's line. I expected to be in Haplogroup H. I was very surprised to find that I was in Haplogroup V. My results from HVR2 surprised me as 72C and 200G seem to be in a minority. I have ordered the FGS (10/2) as a result of these surprises. The expected results are to be in early November.

Date MtDNA Test Was Ordered: April 2006

Comments: Original Haplogroup was "H6a". When FGS was tested, "H6a" was discovered to be in error. FTDNA agreed to change to this to Haplogroup H16 based on scientific papers, although "H16" is not yet in FTDNA's nomenclature -- yet!! Earliest known ancestor in this line is Violet (Unknown) b.ca 1790 in Kershaw Dist, SC. Violet married William SMITH ca 1810 and died in York Co, SC between 1870 & 1880. An exhaustive search has not been able to determine Violet's surname. From the time and place where she was born and died, she could have been of Scotch-Irish, English or German origins. Surnames associated with Violet's children were: HOOD, PLAXICO, BROWN, JONES, CRAWFORD, McFADDEN and HOWELL.

MtDNA Haplogroup: X2 or I

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: August 2007

Comments: OA tells me that I am an X2 but I have been told by someone in their forum that my results match hers and that she is an "Iris", a subset of what OA calls "X". My oldest known maternal ancestor is my great, great grandmother,whose married name was Laverie (I have listed this as my last name in the hopes of finding more Laveries). Both she and her husband were listed

in the 1850 Census (under the entry for my great grandmother, Elisabeth) as coming from "Scotland" (the preponderance of X's in the Orkney Islands would be at odds with my family history as what I know about the history of Scots emigration to the Americas - I believe most Orcadians emigrated to Canada and in the middle of the 1800's). They settled in coastal Virginia. Little is known of them except they were staunch Presbyterians (religion was a very important distinction in those days). A family curiosity is the (relatively) olive skin cast shared by my grandmother, mother, and myself. In spite of our ancestry traced entirely to the British Isles, all of us have, or were, taken as "gypsies" or central European. I have a cousin (a staunch Mennonite) who could easily be mistaken for a visiting Arab potentate. As for surprises, I was beginning to suspect that I was one of the mysterious Melungeons (sp?), although I have none of the other distinguishing characteristics (the Anatolian ridge, "shovel" teeth, etc.)

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: Sept. 20, 2003

Comments: My oldest maternal ancestor that I have found behind my mother's (1916 - 1991) mother's (1894- 1967) mother's (1877 - 1952) mother's(1849 - 1920) mother is Elizabeth Jane Wheeler, born in Gibson County, Indiana on November 15, 1821 and died in Edward County, Illinois on Nov. 6, 1906. The marriage family names for these women were all Great Britain, being Utley, Wilson, and Paul, and this last maternal link I have, Elizabeth, married a man from a family who descended from England, Montraville Washington Utley. All of my pedigree, paternal and maternal, are from Great Britain, the only possible exception a Crocketagne from France in the 1600's, but he immigrated to Ireland and changed his name to Crockett, married an Irish lass.

Comments: My grandmother's maiden name was Moomaw (Mumma), her mother was a Stover, and her mother was a Snyder/Snider, and HER mother was an Eckels, Ekel, Eccle/Eccles, etc., and her mother was Elizabeth Miller/Muller. Elizabeth Miller/Muller is the earliest of my maternal line ancestors that I'm pretty certain about. She was b 24 January 1735-37, probably near Philadelphia, PA. She appears to have been the daughter of Elizabeth Frey (b1719 in Philadelphia Co., PA), the daughter of Ann Catherine Levering (born 1675/76 in Mulheim on the Rheur, now Germany), the daughter of Magdalena Boekers (b ca 1650 Leiden, Holland), the daughter of Sidonia Wilhelmina Braviers (b1631 Leiden, Holland.) The male Leverings apparently came to Holland from England (for religious reasons?) and I am wondering if the same could be said about the Boekers/Bokers/Bakers? and/or the Braviers? My Haplogroup was reported as "unknown" and that surprised me. The HRV1 mutation 16357C seems to be rather rare (though the daughters of the Russian Czar had it, which is interesting to me since some Russian friends of mine who saw my mother's picture said she had a "Russian" face.)

MtDNA Haplogroup: H

HVR2 MtDNA Test Results: Not Tested

Date MtDNA Test Was Ordered: 13 June 2007

Comments: The oldest Maternal ancestor is my great-grandmother Sarah Potts, born about 1889 and died about 1930. My mother is listed as 3/4 Native American and 1/4 white. Her grandmother Sarah Potts is where the white comes from, but she was also part Native American. So I would guess since my mtdna came back with a haplogroup of H, does this mean that Sarah's mother was white also?

HVR2 MtDNA Test Results: 73G, 263G, 315C

Date MtDNA Test Was Ordered: 11/3/2006

Comments: Oldest known ancestor is my great great grand mother Virginie Guichard born in France around 1865 near the town of Airvault (Deux-Sèvres, Poitou Charentes.) I was surprised by this haplogroup as I thought it would be likely to be H,that is most common in Western Europe, K being more present for Eastern Europe and as far as I know we are very french and Catholic... If we are connected in anyway to the Jewish population I'd like to find out :) I've tested my dad as well and he belongs to haplogroup R1b, proud descent of the Cro-magnons apparently. There too we don't know much as we don't know exactly who is father was. The legend says he was a farmer in the South part of les Deux-Sèvres and definitely french too. R1b beig very common in Ireland, I must admit the history of my county shows a strong link to the UK, and my dad has blue eyes and frakles (very Irish indeed..) My dad's results below: DYS19/394 = 14 DYS385a= 11 DYS385b= 14 DYS388= 12 DYS389i =13 DYS389ii= 30 DYS390= 24 DYS391 = 10 DYS392 = 13 DYS393/395= 13 DYS426= 12 DYS437/457= 15 DYS438 = 12 DYS439/GATA A4= 12 DYS447= 25 DYS448= 19 DYS460/GATA A7 1= 10 GATA H4 = 12 YCA IIa= 19 YCA IIb= 23

Any comments welcome.

Comments: I was surprised and honored to be a part of one of the oldest genetic lines alive today. The Bantu speaking African that shows up compares favorably with what I found out on Ethnic Tribes (BioGeographic Ancestry). This was a good starting point but left me eager to find out more because it is showing very, very ancient lineages. The other stuff...I don't know what it means. If anyone does and its interesting let me know.

Date MtDNA Test Was Ordered: May 2007

Comments: Hi - My oldest known maternal relative is Margaret Forbes, born around 1771/2 in Edinburgh, Scotland, UK. Margaret married James Ferguson and only seems to have had one daughter, Margaret, born on 5th July 1790, also in Edinburgh. All my relatives branching off from here are either East or West coast Scottish as far as I can tell. When I got my results from Roots for real they told me that I have a perfect MtDNA match with 1 person living in the Stavropol region of Russia and 2 people living in Iceland. (These people would have been anonymous volunteer donors in DNA research trials.) Thanks and good luck! Sharon

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: April 2007

Comments: MtDNA - Louise C. Rhude Born 1867 (where?) died 1943 in MN. May Ortila Skundberg born MN July 1886 died MN 1990. May Ortila Skundberg's first language was Norwegian in the home and English in a one-room schoolhouse in rural MN. She could read, write, and speak Norwegian fluently and traveled to Norway for the first time at age 86 where she received a marriage proposal, but declined. Y-DNA - John Rook immigrated to the USA from England in the 1800's. Herbert Wilson Rook was born December 21, 1893 in St. Louis, Missouri and died November late 1960's in MN. Y-DNA testing indicates my Father was actually more Scandinavian than my Mother who claimed to be 50% Norwegian. He always teased her that he was probably more Norwegian than she because he loved Lutefisk and Lefse much more than she did. Turns out he was right.

Comments: Jewish family. Zelda's maiden name currently unknown. Married Julian Domisch (some folks say Dornish, but most likely Domisch). Their daughter, Rebecca, married Harris Venezky. Harris reports, "Rebecca came from the state of Slovain in Russia. She came to America (NY) in 1882 and lived at Rodkens Place, NY City, near Cherry Street. Rebecca's sisters were Esther, Sophia and Pauline and her brother was Louis Wolfe." Not sure what area Slovain could possibly be. Judy Bolton is the contact person for Gussie Needle.

Comments: My oldest known female relative was Fannie Barr, Odessa, Ukraine, b. July, 1870. I don't know much about her. I do not have a maiden name, and am guessing she was from Odessa (or surrounding areas). It is actually possible she came from somewhere else in Eastern Europe. She married Joseph Barr. They lived in New Jersey, in the Rosenhayn area. Their daughter, Gussie Barr, married David Venezky, and moved to Maryland, just outside of Washington, DC.

Comments: The maternal ancestors of my mother have lived for at least 150 years in South Bohemia (South part of the Czech Republic) in the countryside in small villages and towns. Two major ethnic groups lived in that area: Czechs and Jews (my mother was born in the small town of Lukavec that had in the 19th century about 20% Jewish population. My grandmother (mother's mother) was born in that area, lived there all her life (she died at age 89 in 2004). Her cousin left the region before WWII and has lived (and their children, grandchildren...) in the Chicago area. My mother and I have been living in Prague.

MtDNA Haplogroup: Haplogroup K

HVR2 MtDNA Test Results: not tested

Date MtDNA Test Was Ordered: June 2006

Comments: My brother's ydna came up E3b My SNPs is K10550 Paternal family from Sardenia and Duress, Albania Maternal family from (now) Lichtenstein or Austria The results were a bit of a surprise since my mother and father were born in Mexico, so we expected to see indian or aztec in the mix somewhere even though we knew that our ancestors had come from Europe we never had records but we did have stories. There was quite a bit of secrecy surrounding our ancestors, so

we pursued the testing. There was rumor that our ancestors were Jewish and we did grow up with some typical Jewish traditions but we grew up as Catholics. Most of my sisters have felt strongly that they are of Jewish descent or relate to that particular belief system strongly. It has been a much disputed subject so the testing was also done to settle the issue, however it managed to make it more possible than impossible since our test results reveal that we are likely of Ashkenazi ancestry. My sisters blindly believe, my brother strongly disputes, but I decided first to turn to science to prove or disprove it. It is a silly dispute anyway, knowing does not change who or what we are.

Date MtDNA Test Was Ordered: 11 April 2007

Comments: Earliest known maternal ancestor, Mary BUSH, was born in Kentucky in the mid-18th century, presumably with English or Scots-Irish origins. Henry RUNYAN of Hamilton Co., OH, married in Harrison Co. (W)VA, 11 Oct. 1784, Mary (BUSH) HAGLE, widow of Michael HAGLE. Mary was the widow of Michael Hagle as found in Harrison Co., VA, deeds. The deeds also show that Henry, Mary, and her son John Hagle, were of Hamilton Co., OH, when they sold land in Harrison Co. Mary's surname was very likely Bush, and perhaps she was the dau. of George and Mary (-) Bush of Harrison Co., VA. They had a son Isaac RUNYAN who was b. (per census) KY, 1793 and d Hamilton Co., OH, 1882. He md Jane NIXON in 1813.

Comments: BLACK, Esther b. 17 Jan 1769 Macon Co. NC; d. 23 May 1835 Jackson Co. NC. THOMPSON, Jane b. 24 Apr 1797 Rutherford Co. NC; d. aft 1870 Tippah Co. MS. SELLERS, Maragret Minerva b. 30 Dec 1825 NC; d. 15 May 1900 Union Co. NC. ROSS, Martha Verlinchia Franklin b. 6 Jan 1849 TN; d. 20 Jul 1913 Myrtle Union Co. MS. DODDS, Sarah Allen b. 29 Sep 1870 Myrtle Union Co. MS; d. 28 Mar 1953 Ruston Lincoln Parish LA. Esther Black's mother may have been Elizabeth UNK md. to Thomas Black, Lincoln Co. NC. Elizabeth Black md. Morris Cox, 2nd.. All of the above is from searching for and pursuing paper trails, with the help of one very good researcher in my extended family. I have done a full sequence mtDNA test and hope that sometime in the near future that can be used to find out who Esther Black's mother was. I am

surprised at how unhelpful FTDNA has been so far. I have made a proposal as to how to securely (a full mtDNA test includes disease genes) allow people who have done the full sequence test (which corresponds to a 41 marker Y-DNA test) find exact matches, but FTDNA wants no part of it. I wonder why they even do the test!

Comments: Maria Klara Tresch, b. abt 1800, Canton Uri Switzerland. My Grandmother's family goes back to the late 1500s/early 1600s in this valley (Reuss Valley) in Switzerland. I have not finished the research on the maternal line. I think this is an old line in this area, that was fairly isolated until modern times. Families intermarried quite a bit. It is through this valley that travelers go to get to the St. Gotthard Pass. The tunnel through the Gotthard wasn't built until the 1870s.

Comments: I was adopted and have been trying to find out at least my lineage. The agency told me I was German and English and my adoptive mother had told me I was French and Irish. Many people have thought my eldest daughter and I were of either Italian or Greek descent. I thought a

MtDNA test might give me some answers to at least that part of my heritage. As I check the web to understand these results, I find that European background is probably a definite, and also the Italian ancestry may be a strong possibility. It's very interesting.

Comments: Oldest known maternal ancestor is Maria Immerl. She was born in Austria (possibly Steyr, Upper Austria) around 1860. She married Leopold Zehethofer in 1880 or therabouts in Steyr, Austria. They had 11 children. I was surprised at how few U3s there are in the part of the world where my ancestors came from. I had to laugh at reading that a significant proportion of Europe's gypsies are U3 -- my grandfather used to tell my mom he was certain she had SOME gypsy blood in her. Also, we tend to be more darkly complexioned -- not a blond in the bunch, which makes me more likely to concur with the Middle Eastern ancestry of U3s

Comments: My grandmother's maiden name was Thompson and her mother's maiden name was Doyle. They are from west central Louisiana and have very dominant Native American backgrounds-Choctaw, Caddo, and Cherokee. However from my Halpogroup H I know that at

some point long ago there was a line from Scandiavia or Scotland, thus the Thompson (MacTavish) last name which was a great surprise since I did the Maternal Native American DNA test. Everyone in my mother's family (Ashmore) looks Indian-dark hair, dark skin, family stories and pictures. I have a picture of my great grandmother Liza Doyle Thompson when she was a child at the turn of the century dressed in tradional Caddo dress and hairstyle. The family went once a year to an annual weekly gathering at a lake in the middle of Caddo territory between Louisiana and Texas to sing, dance, tell the old stories.

Date MtDNA Test Was Ordered: December 2003

Comments: Earliest known maternal (mother's mother's...) line ancestor, my great great grandmother: Reiza bat Movsha NEMENCHINSKY, 1822-1890, Vilna, Lithuania. Her daughter: Noima SAPOZHNIK, 1859-1940, Vilna. Her daughter (my grandmother): Malka TABACZNIK, 1883 Vilna-1966 New York. To my knowledge, the whole family is Ashkenazic Jewish, with no intermarriage from earliest date up to circa 1950. I would like to determine if my line is at all Sephardic, although I have no family information regarding this possibility. I would also like to determine which route family took from mid-east to Eastern Europe: via Rome then North, or via Spain then East. Bennett Greenspan of FTDNA postulates a Roman origin for my maternal line. The possible Roman origin was a bit of a surprize to me, and I would love to further document this or disprove it. Alas, I have been unable to persuade the few remaining Cymerman males (my father's father's...line)to test their Y-DNA, so I am stymied in that direction. Wish you had an instant persuasive kit I could give them! Thank you Isabel Cymerman

Comments: The maternal line on my father's side, I can trace no further at this point than Margaret Buchan, born 1819 in Aberdeenshire Scotland. She immigrated to Ohio to marry a man that had preceded her from Moreyshire Scotland. They moved to Mo., Ill. and Ia. where she died in 1897. She had eight children. My ggrandmother, Harriet Ingram, the youngest girl was born in Ill. in 1858 and died in Iowa in 1945. My grandmother, Bessee Lesan, was born in Ia. or Mo. in 1885 and died in 1958 in Ia. The Y DNA on the paternal side tested R1B1C and comes from the Alsace/Lorraine area, now part of France--ancestors who immigrated in the late 1840's and early 50's en masse through Ohio and Ill. and ended up as original European settlers in Ringgold County, Ia. They were Saltzmans, Mosiers and Eglys from the Amish/Mennonite community. Neither DNA result was a surprise.

Comments: My g grandmother, Randy Hofstad, was born in the Trondheim area of Norway in

1848. To date she is my earliest known ancestor in my maternal line. She immigrated to Mn. Married as planned to a man from the Trondheim area who had already homesteaded in SD where she moved. She had 14 children before her death in 1915 in Union County. SD. Her 13th child was my grandmother, Rosabel Lewison, who died in childbirth in 1930. From what I understand this part of Norway has some "J" results, I will be interested in what develops as the database increases.

Date MtDNA Test Was Ordered: Feb. 9, 2007

Comments: My great-great grandmother was either born in Canada or in Minnesota around 1846?. I do not know her maiden name. I suspect she was a Mdewakanton Dakota Sioux though I am unsure of this. I believe she was married to a mixed blood Native American born in Canada around 1840 - Louis LeClaire. He shows up on the Mendota, MN census when he was 19 years old with his family. There were a number of LeClaire men living in Mendota, MN within a ten year period with young wives and children. These young men were approximately the same age so I suspect they were brothers or related in some way. Harriet LeCaire's daughter, Lily LeClaire, my great-grandmother, was born in 1876 in Mendota, MN and married an Irish immigrant, John Devine. They continued to live in Mendota, MN. Her daughter, Lillian Devine, my grandmother, was born in Mendota, MN in 1899. She lived in Mendota, MN on and off throughout life. Many of the people in Mendota, MN were of mixed blood heritage. It is a smaller "village". As a young child I was told that I was not of Native American heritage yet most of my cousins were Native American on my mother's side. My grandmother told me that she knew she was not of Indian heritage. Two years ago I met a cousin after many years and he asked me if I was aware that I was of Native heritage. I told him I didn't know but had always suspected. My cousin told me my son looked more like the LeClaire boys, those of mixed blood, than they did themselves. (My son was born in Minnesota and looks like a minority in a sea of nordic people :-). After speaking with my cousin, I began to research my Mendota family. I found that they disappeared from the Mendota census about the time of the 1862 Sioux uprising in Minnesota. Later some, but not all, reappeared. I did not know if they were ever on the tribal rolls and would have to do a great deal more research. I suspected since my family may have lied about being Indian that they would never show up on any tribal roll. I decided to take the quick route to find if I was of Native American heritage by doing a genealogical test. With all of this said, I am not surprised to find that I am of Native American heritage. It makes sense to me. It's like a piece of a puzzle has been found. Truthfully it is a little weird to be told you aren't of native heritage when all your relatives are native at least on one side... My mother is still alive and so happy to know this information. My mother told me that until the day of her death, my great-grandmother wore her hair in a long braid and appeared in every way physically to be a Native American. I am happy to know this information. I told my son who was very happy to know. At least he has some idea of why he might look like the minority in a sea of nordics. I do believe my son looks like my Mendota relatives - moreso than me. It's really great that we can now trace our roots in this manner. I was always told I was Swedish but you should see me. It's kind of funny :) Take care and I hope this might help someone.

MtDNA Haplogroup per HVR1 Results: U2

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: July 2005

Comments: My oldest maternal ancestor found so far is Marie Jeanne Darras, born around 1740

in the Paris region, France >> Marie Jeanne Angélique Baucheron, born 1766 >> Anne Euphrasine Bouquet, born 1790 >> Constance Denise Thibault, born 1817 >> Léonide Clémentine Sevin, born 1841 >> Augustine Elisabeth Sevin, born 1863 >> Germaine Balan, born 1890 in Toulouse, France >> my grandmother >> mother >> myself. This line starts in France and stayed there ever since. I'm hoping to go still further to find a link one day with other U2s from French origins or other European countries! It seems a difficult task though, since U2s are not very common and it's a very old haplogroup!

Date MtDNA Test Was Ordered: 2006

Comments: Mother's mother was Elsie Canny, her mother was Anna Schnell, her mother was Lovelia Kumre and last known maternal link was Susannah Miller born around 1826 and died in Illinois. Ethic origin unknown. All these women, including me, have dark brown hair and some have dark olive skin tone. Also 3 generations back to back died of breast cancer. Did not pass on to my grandmother she lived to be 87 years old. We have also heard that rumor that we might have Indian ancestry through this line. I would be willing to communicate with other Haplogroup K's.

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: nov 2006

Comments: Our African American family is from the Jackson Parish area of Louisiana since approx 1870. Mary ??? born approx 1853 Married Jonathan Powell, family oral history suggests her maiden name was Jefferson. In the 1880 Cencus there are numerous Jefferson Surname families living in the area. She was born in 1853, Louisiana. Mary reported on all census records that her mother was born in Maryland.

Date MtDNA Test Was Ordered: August 2006

Comments: Cathy/Caty Cassady, b. Feb. 1798-Randolph Co., NC, d. 1828-Bibb Co., AL; Scintha Lawrence, b. Bibb Co., AL; Frances "Fanny" Parker, b. 1848-AL; Jennie Ham, d. TX; Mamie Teel, b. TX, d. TX. Mamie Teel still spoke Choctaw in her old age and was said to be of NAI ancestry, probably through her father, Jennie Ham's husband, William Perry Teel, through mother Katherine "Kate" Petill/Petill/Patillo (with ties to Cochrans). The Ham's and Teel's lived in Tishimingo, IT, OK. The Y-DNA Haplogroup of A. Dennis' brothers is Q3. Y-DNA connects to families of Cherokee descent by the name of Freeman, which is not our surname.

Comments: Earliest known maternal ancestor is my great grandmother Anna Roeinz, b.c. 1850, Kona (Kaunas), Lithuania. Anna's daughter was my grandmother Pauline Shemet, b. 1890, Kona. Pauline's daughter was my mother Mary, b.c. 1913, Indianapolis. Results were completely different from my expectations. I thought we would have some East Asian influence. I also had feeling of closeness to American Indians, but it turns out I am from Haplogroup I, which essentially made a bee-line from central Africa to around what is now Moscow, then turned left and went through northern Europe, probably through Belarus, and Lithuania.

MtDNA Haplogroup per HVR1 Results: H

HVR2 MtDNA Test Results: Not tested

Date MtDNA Test Was Ordered: Dec 1, 2006

Comments: My maternal-maternal-maternal great-grandmother was put into an orphanage in Pennsylvania around 1874 at the age of 2, when first her birth parents and then adoptive parents died of smallpox. She thought her parents were French but was not sure.

MtDNA Haplogroup per HVR1 Results: U

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: 9 September 2006

Comments: My earliest known maternal line ancestor: Jane Dymond, born ca. 1835, probably in Wyoming County, Pennsylvania; she married Frederick Whispell ca. 1852. Research suggests she was the daughter of William Dymond and Catherine Kesinger. The Dymond family came to PA from Woodstock, Ulster County, New York.

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: December 6, 2006

Comments: Oldest maternal relative was Cayetana Sepulveda probably born around 1760. My maternal line is from Cabo Rojo, Puerto Rico. Cayetana Sepulveda's daughter was Maria del Carmen del Toro. Her daughter was Maria del Carmen Cardoza. Her daughter was Maria del Carmen Hernandez. Maria del Carmen Hernandez was the mother of Maria Monserrate Ojea born in 1892. Monserrate Ojea was my great-grandmother.

MtDNA Haplogroup per HVR1 Results: I

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: December 2006

Comments: My earlier known female ancestor is a Susannah Schler(n)/Sehler(n). She married John Adam Roush in Virginia in 1740. John Adam Roush was from "PalitINETTE" in Germany and it is probable that Susannah's family was also. My female line goes from the Shenandoah Valley in VA to SW VA (Lee, Scott Counties), up to KY (Rockcastle, Pulaski Counties) then to SW Indiana (Gibson County). Surnames along the way were SCHLER(N)/SEHLER(N), ROUSH, ZIRKLE,

ROLLER, FORGEY, TYREE, SOWDER, AHLEMANN and HARVEY

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: 11/2006

Comments: As of this writing I know little of my genealogy. I was adopted at birth in 1952. I met my birth mother, Leona Atcherley in 1996. She told me my grandmother's name (her mother) was Ida Keaunui Yowell. Her mother (my great grandmother) was Helen Keaunui born in 1892 based on Ida Yowell's birth certificate. I'm trying to connect with Keaunui's at this time that have knowledge of their past genealogy, and who is alive now that I am related to.

MtDNA Haplogroup per HVR1 Results: U5b

HVR2 MtDNA Test Results: Not Tested

Date MtDNA Test Was Ordered: 15 November 2006

Comments: My earliest known maternal ancestor was Netty Moscovitz who was born in Russia in 1869. That was her married name -- I am uncertain of her maiden name. I believe that she emigrated to Canada in the 1880s, later settling in Oregon. My ancestry is Jewish on both the maternal and paternal sides. My father's haplogroup tested J1. I had assumed that I would also fall into one of the four haplogroups, which the majority of Jewish women fall into. It was surprising to find that I am U5b, which I understand is considered to be one of the oldest European haplogroups with Scandinavian roots. What an amazing journey the last 50,000 years must have been!

HVR1 MtDNA Results: 16,092, 16,129, 16,147A, 16,154, 16,172, 16,223, 16,248, 16,320, 16,355

MtDNA Haplogroup per HVR1 Results: N1a

HVR2 MtDNA Test Results:

Date MtDNA Test Was Ordered: August 2006

Comments: The most I know of my female ancestors are they are from IRELAND. That is why finding a N1 haplogroup is so interesting to me. N1s are rare in Northern Europe. I am very curious now as to when N1 did make migrations, no matter how minor they were.
