No Taxation without Responsive Representation!

Here is my suggested new Tea Party rallying cry.

"No Taxation without Responsive Representation!"

What good are elected representatives if immediately after they win election or re-election they no longer listen to the people?

All "We the People" ask is that the now arrogant and non-responsive Congress start really LISTENING to "We the People" and take appropriate action under our Constitution! If not we will vote them out of office in 2010 and 2012. We are sick and tired of the typical double-talk, non-response, response and lip-service we get from our elected officials once they get to DC. We need to wrest control of our elected officials from the political parties and make them responsible to us, We the People, and not their respective national political party leadership and committees. The people elected them. They need to listen to and respond in a true and real manner to the people. Lip-service, double-talk, Washington-speak, no longer works. That type of superficial representation with an elitist enabling main stream media allowed a Usurper to manipulate his way into the Oval Office. We've had it with that.

Whether it's the people's plea about excessive taxation, out of control spending, or the questions about the Usurper in the Oval Office, the Congress needs to start listening to the people and taking action under the Constitution to protect our Constitutional Republic liberties and freedom.
