Did Obama Make a “Freudian Slip” in His Book “Dreams From My Father” on Page 26 and Reveal a Clue to Us That He Was Born in Kenya?

In Barack Hussein Obama, II's autobiography “Dreams From My Father” when he writes about his father and a news article he discovered about his father, and states on page 26 that he had a copy of his (Obama II's) birth certificate and vaccination forms at that time folded in with the news story about his father, he writes the following:

“I discovered this article, folded away among my birth certificate and old vaccination forms, when I was in high school. It's a short piece, with a photograph of him.”

It is not common for children born in the USA to have and keep in their possession copies of vaccination forms. But it is in Kenya. In Kenya vaccination records are routinely kept with the birth certificate record. See this video which shows within it a picture of a Kenyan birth certificate which shows that vaccination records are kept as part of those vital records. The screen shots of these forms are about at 1 minute and 30 seconds into the video. Keeping your vaccination records with your vital records makes sense in a continent like Africa but is not consistent with a child born in the USA.

Thus, did Obama make a “Freudian Slip” in his book, “Dreams from My Father”, and give us a clue on page 26 as to where he was really born, i.e., that he was born in Kenya, and he knows it? If he has a copy of his birth certificate AND vaccination forms, and they were performed in the USA, why does he not release one or more of those vaccination forms he said he had and/or tell us who was the doctor who performed the vaccinations in the USA? Did Obama's mom use the Kenyan Birth Certificate forms to enter the history of Obama's childhood vaccinations and that is what Obama discovered and mentioned in his book on page 26. He surely would have received some vaccination in the USA prior to going to Indonesia at around age 5. And if the vaccinations are part of his Kenyan birth records, that is consistent with procedures in Kenyan documents of also using the birth certificate second page to track and record vaccinations as the person grows. Are those vaccination records he mentions (no matter where the vaccinations were performed later as he grew and went to school ... Hawaii or Indonesia) an integral part of the original Kenyan birth certificate records and forms given to his mother at his birth in Kenya, i.e., annotated thereon in the spaces provided as the child grows, such that he cannot release them separately. When Obama was enrolled in Kindergarten, he likely had to provide the proof of vaccination. If those vaccination records were added into the fields provided in

the Kenyan BC form, page 2, and were at the time Obama found them an integral part of the Kenyan Birth Certificate forms, that gives one a good reason to make sure why all the Kindergarten enrollment records disappear. Mom may have used the Kenyan form to record vaccinations and gave the Kindergarten people a copy of those forms. What Obama does not explicitly tell us about those vaccination records when he speaks of them in his book may actually reveal a lot more to us now when you look at all his statements over time and why certain records like vaccination records are not being produced. The vaccination records may have been recorded on page 2 of his Kenyan Birth records forms and making a copy of that part would reveal the true origin of the form, even though the vaccinations were done elsewhere later in his childhood. Even Obama cannot hide from Dr. Freud. Did Obama make a Freudian slip in writing those words? He made another one during the campaign when being interviewed by George Stephanopoulos.
